*Heart-lung machine: A device that temporarily takes over the function of the heart and lungs. It is used to stop the heart from beating while heart surgery is performed.

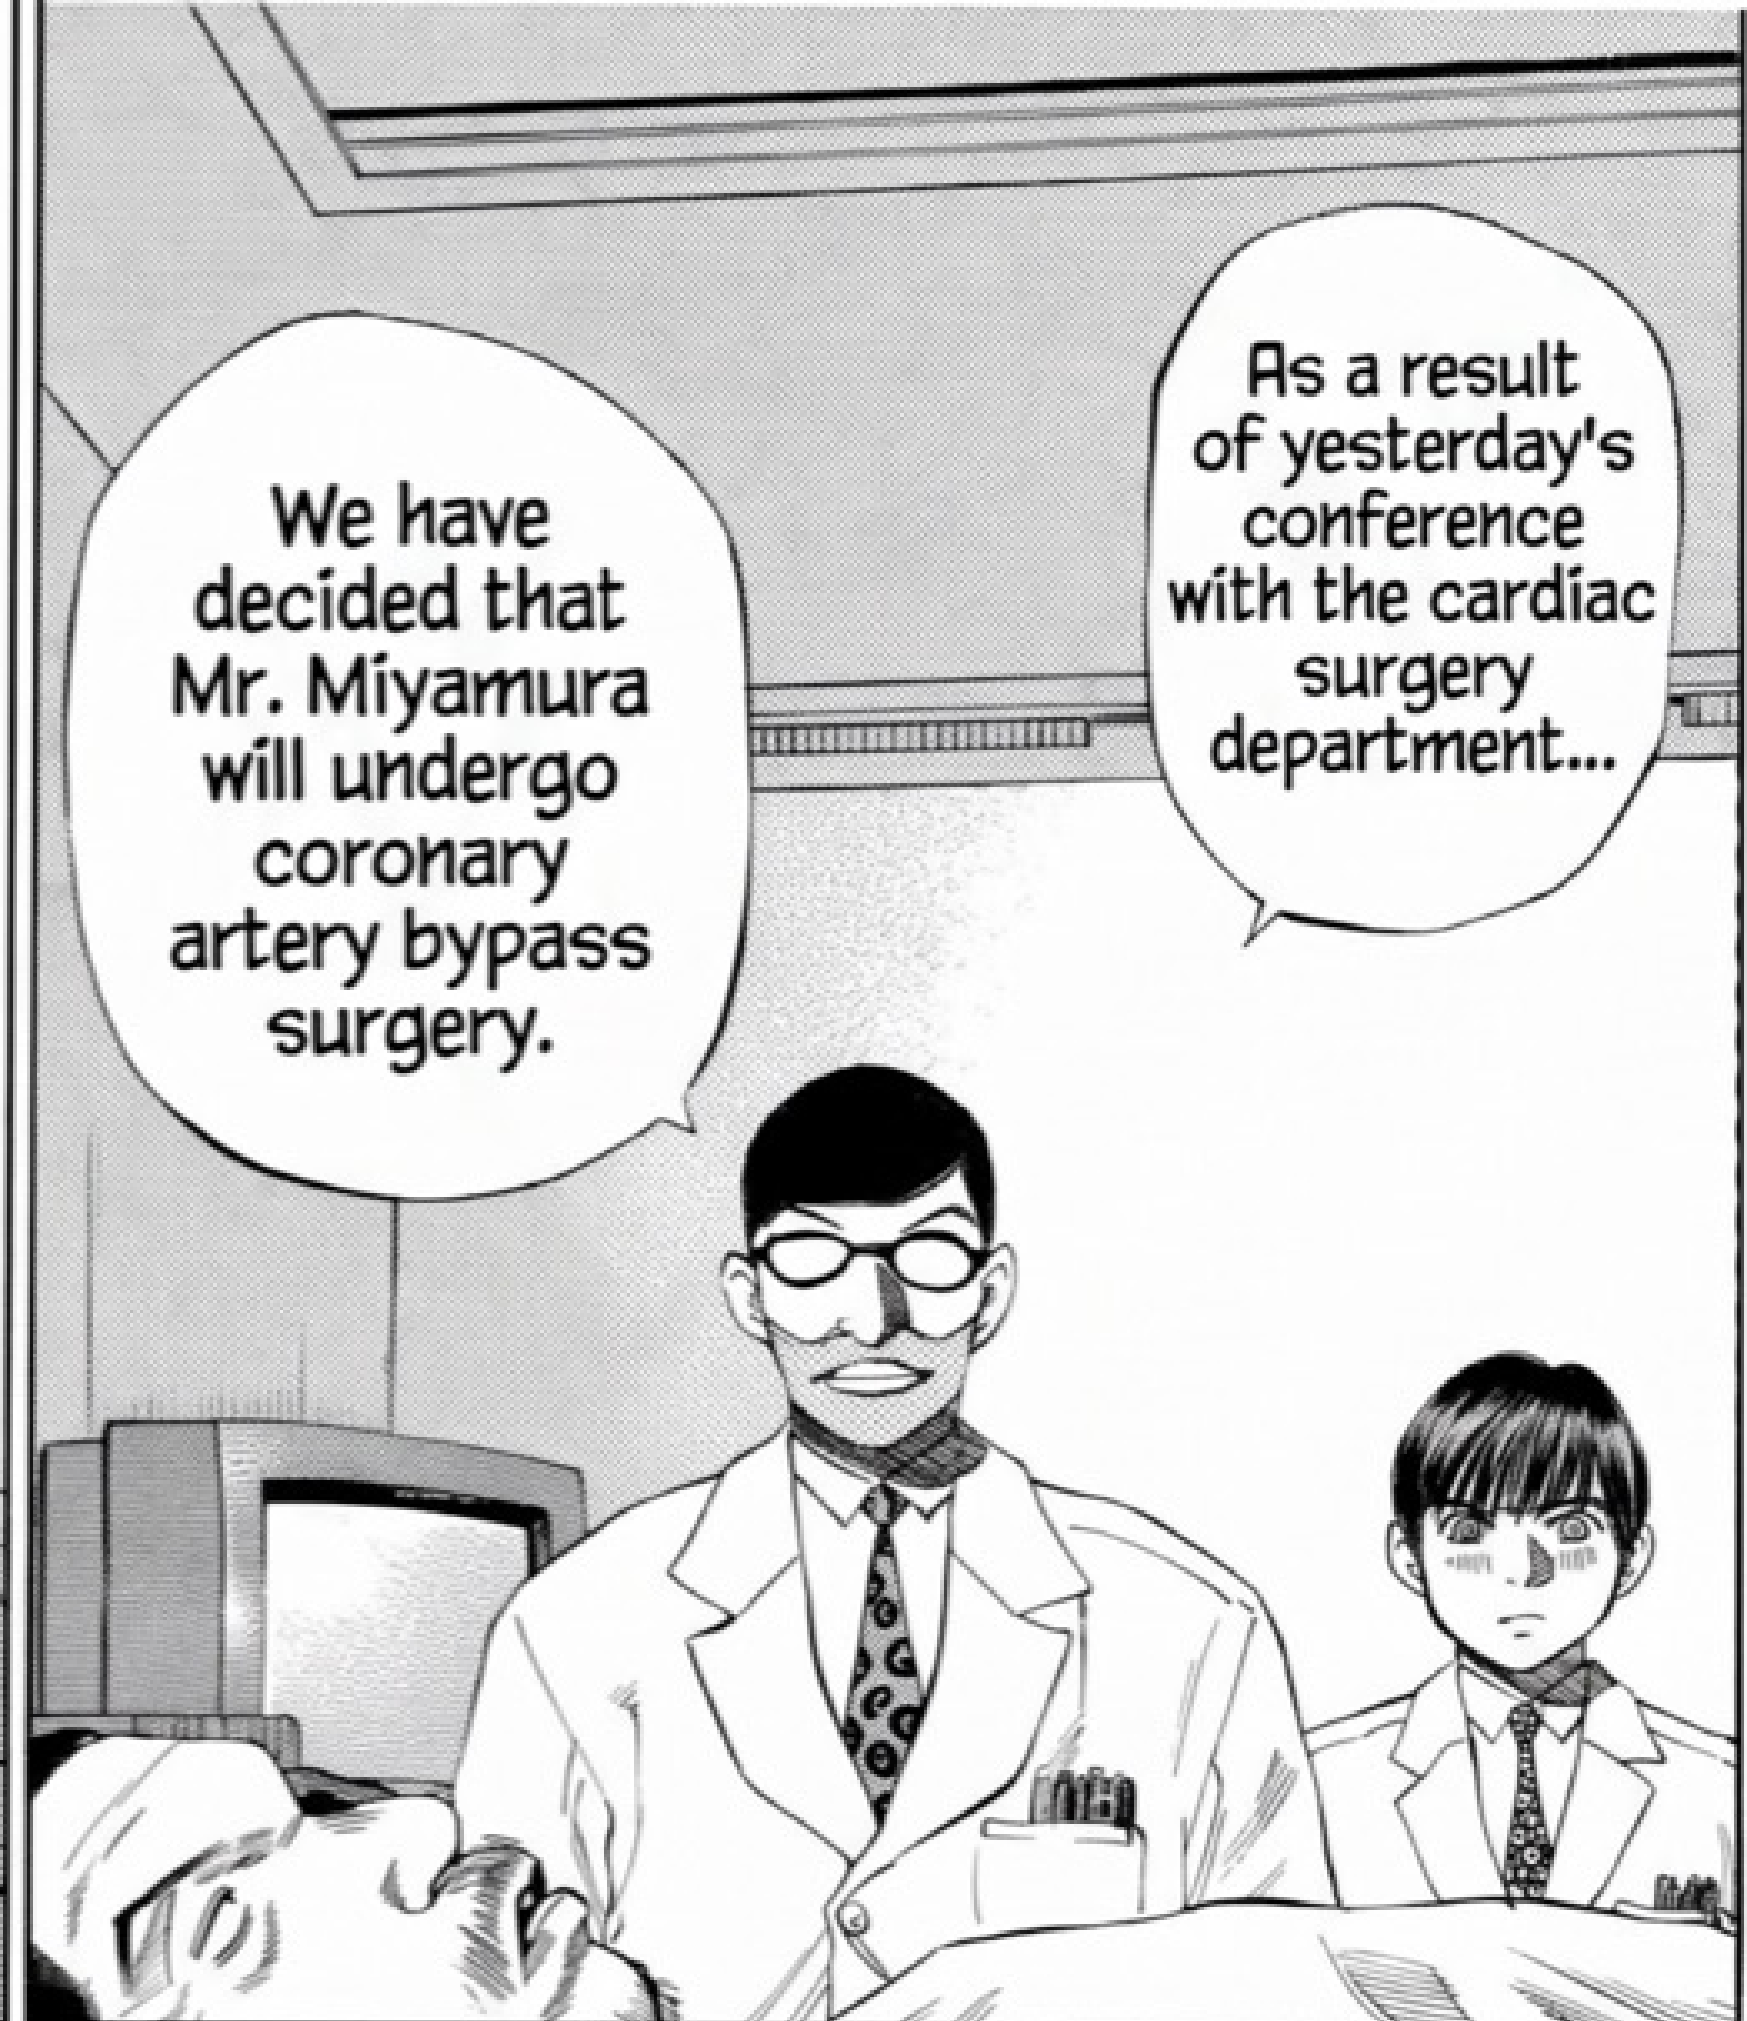

THE SUCCESS RATE OF
MR. MIYAMURA'S SURGERY IS

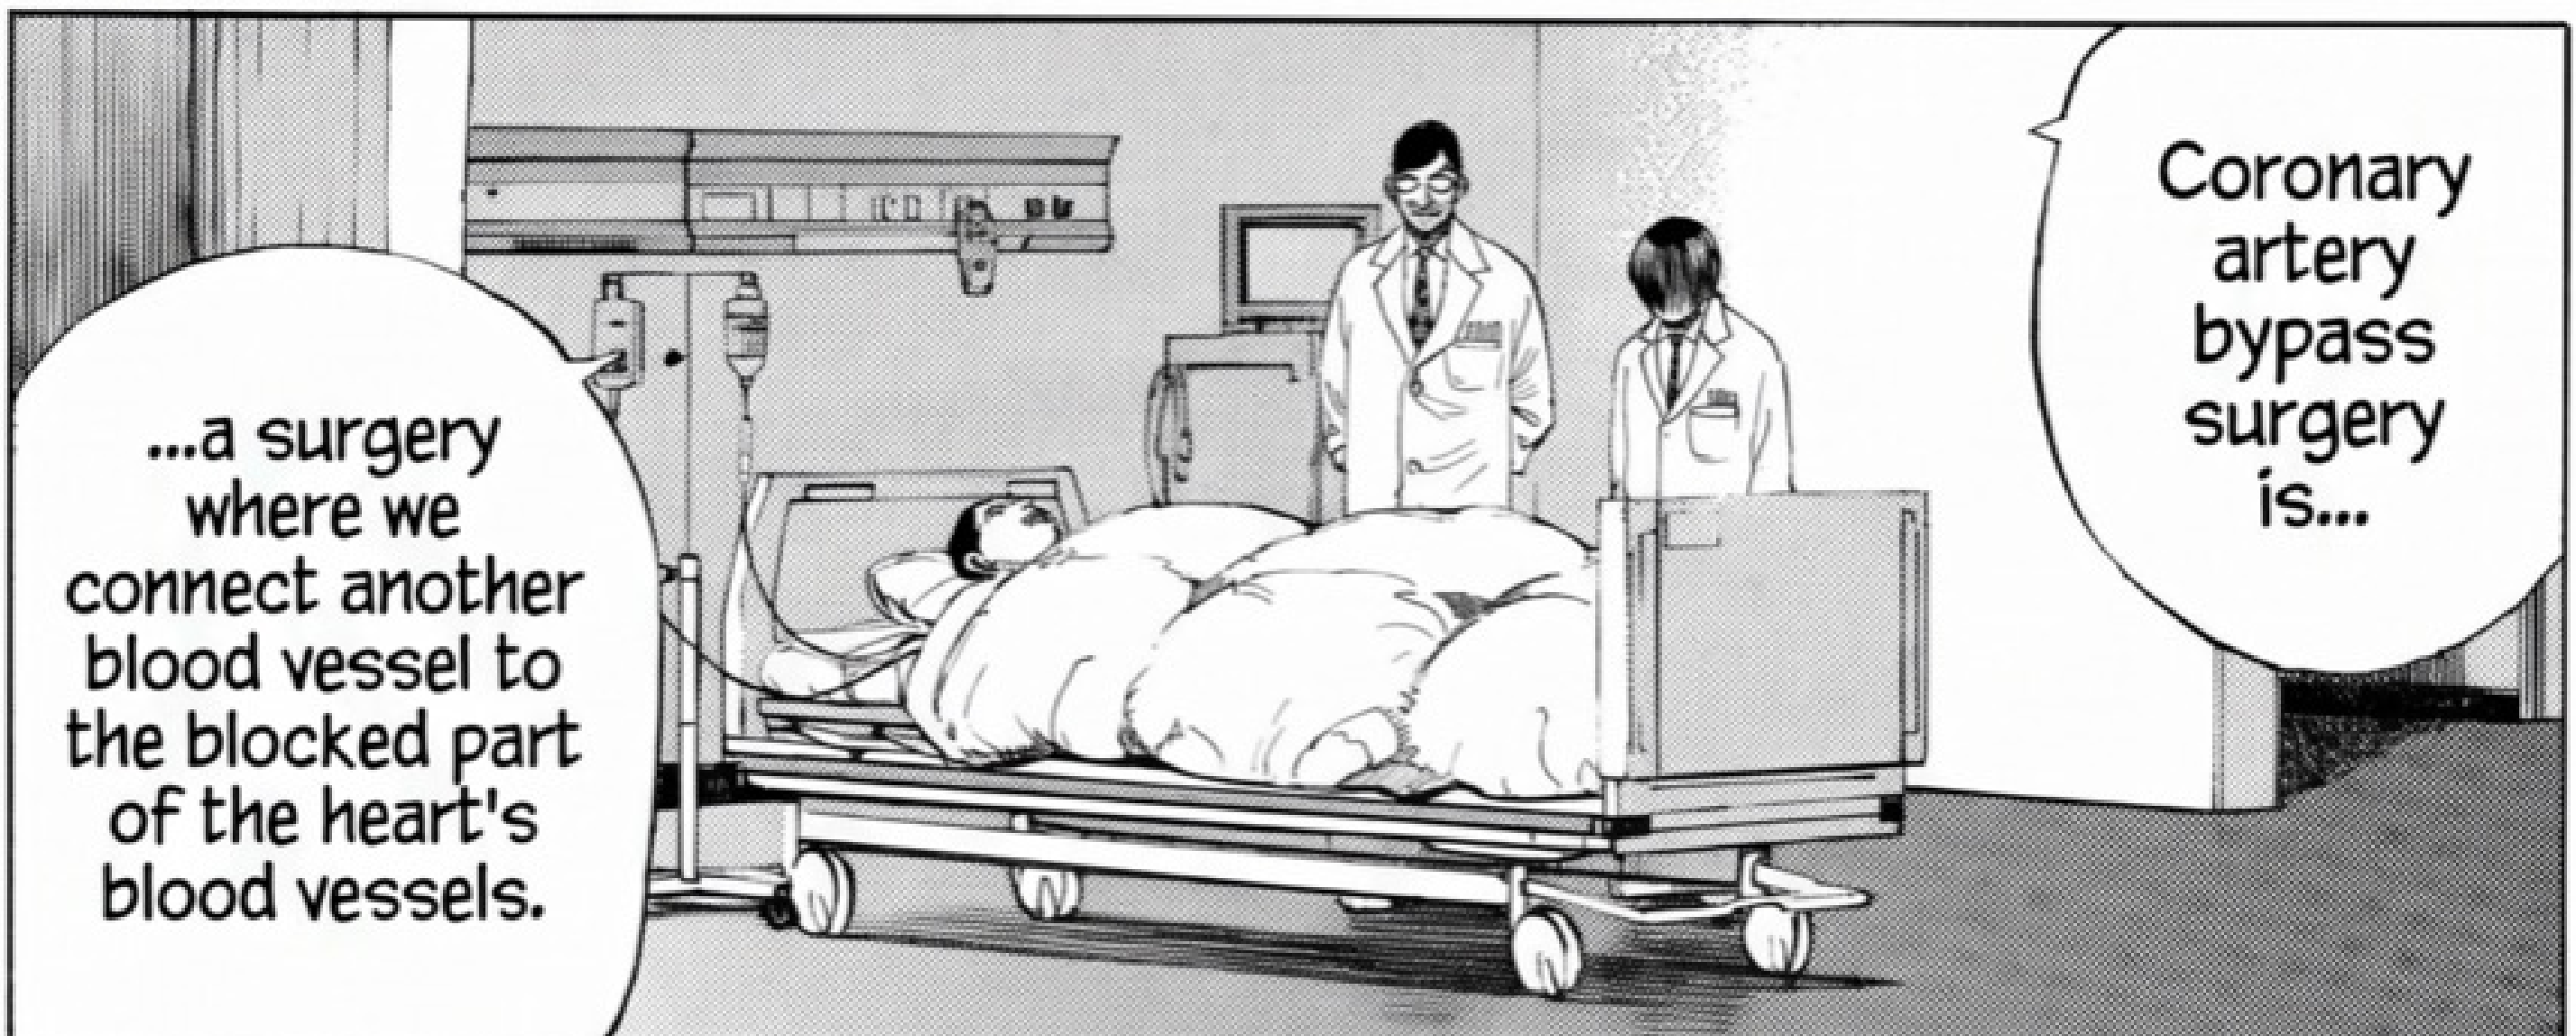

EXTREMELY LOW.....!!

CHAPTER 8 CONFESSION

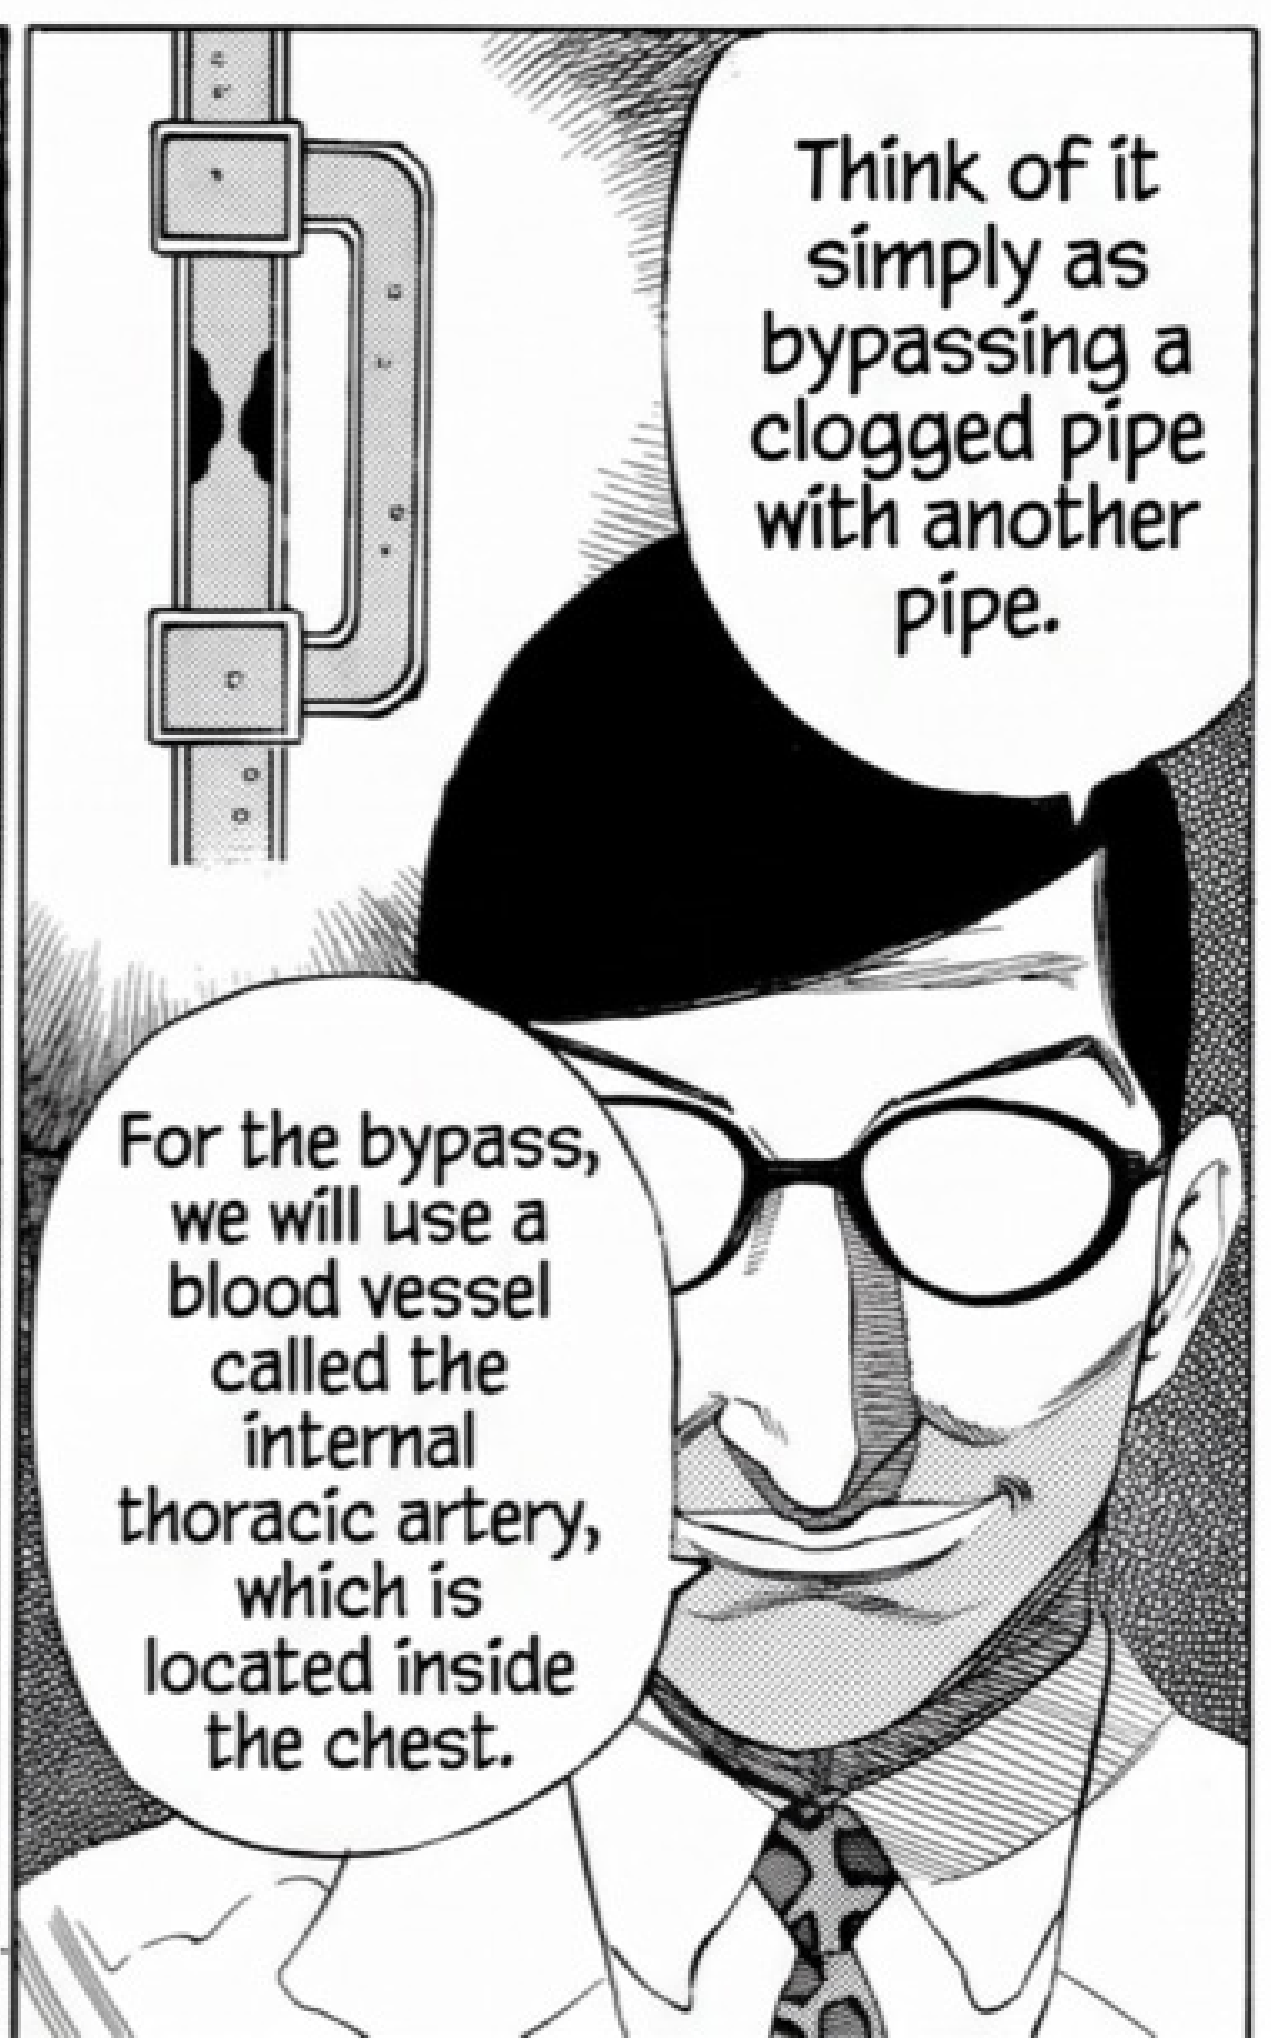

We have decided that Mr. Miyamura will undergo coronary artery bypass surgery.

As a result of yesterday's conference with the cardiac surgery department...

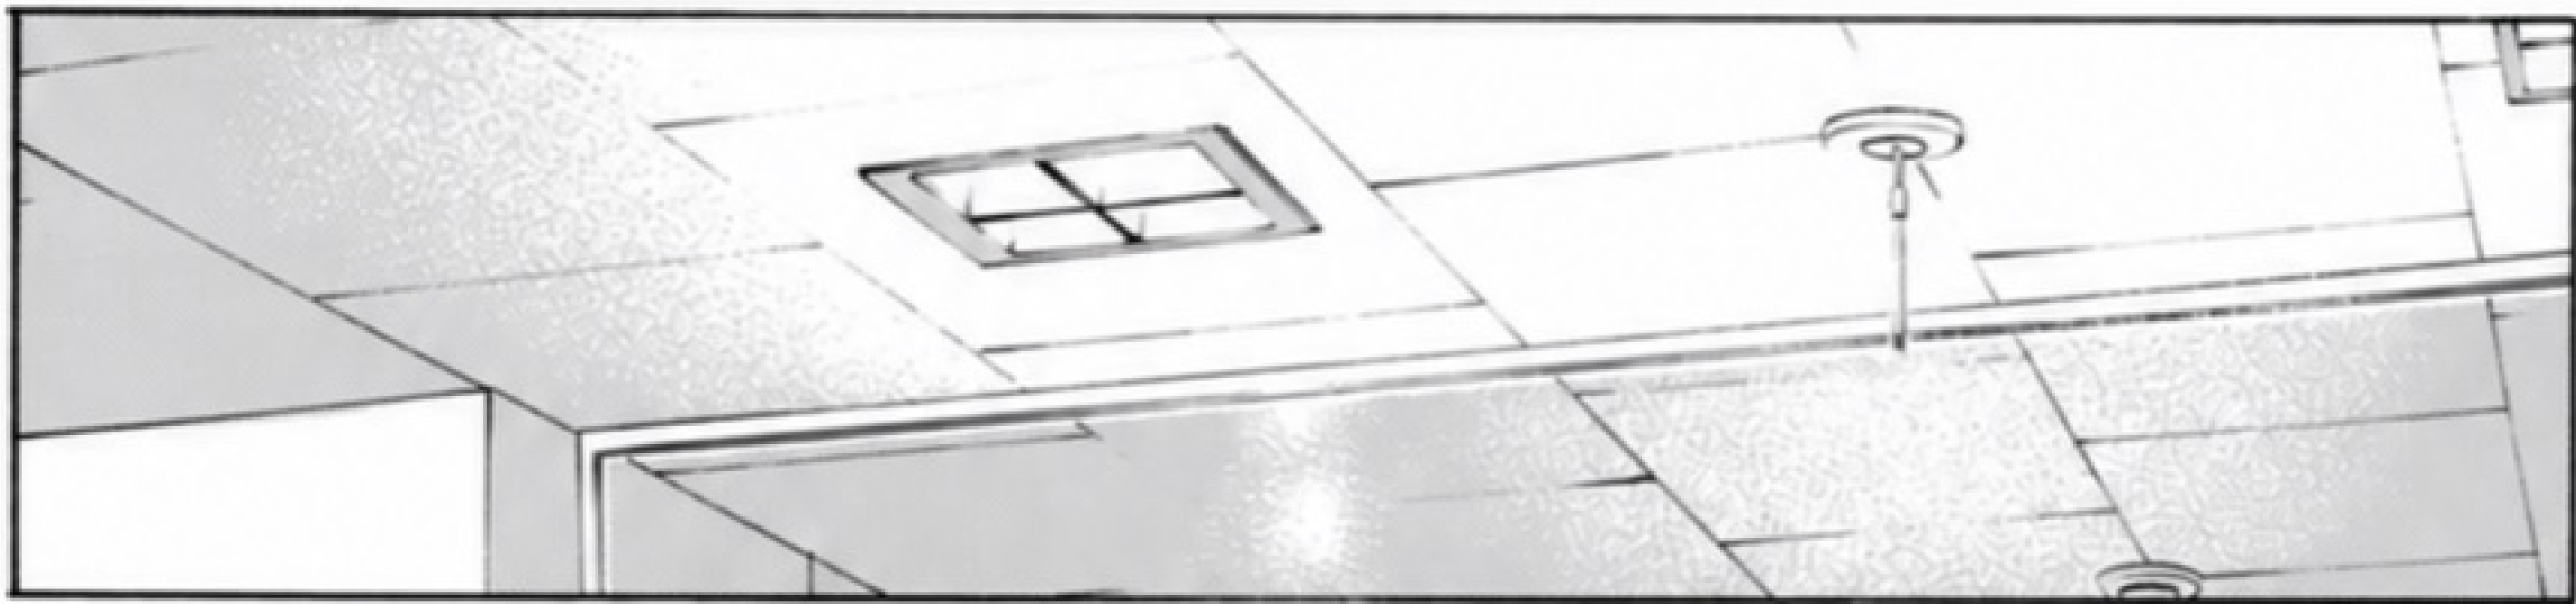

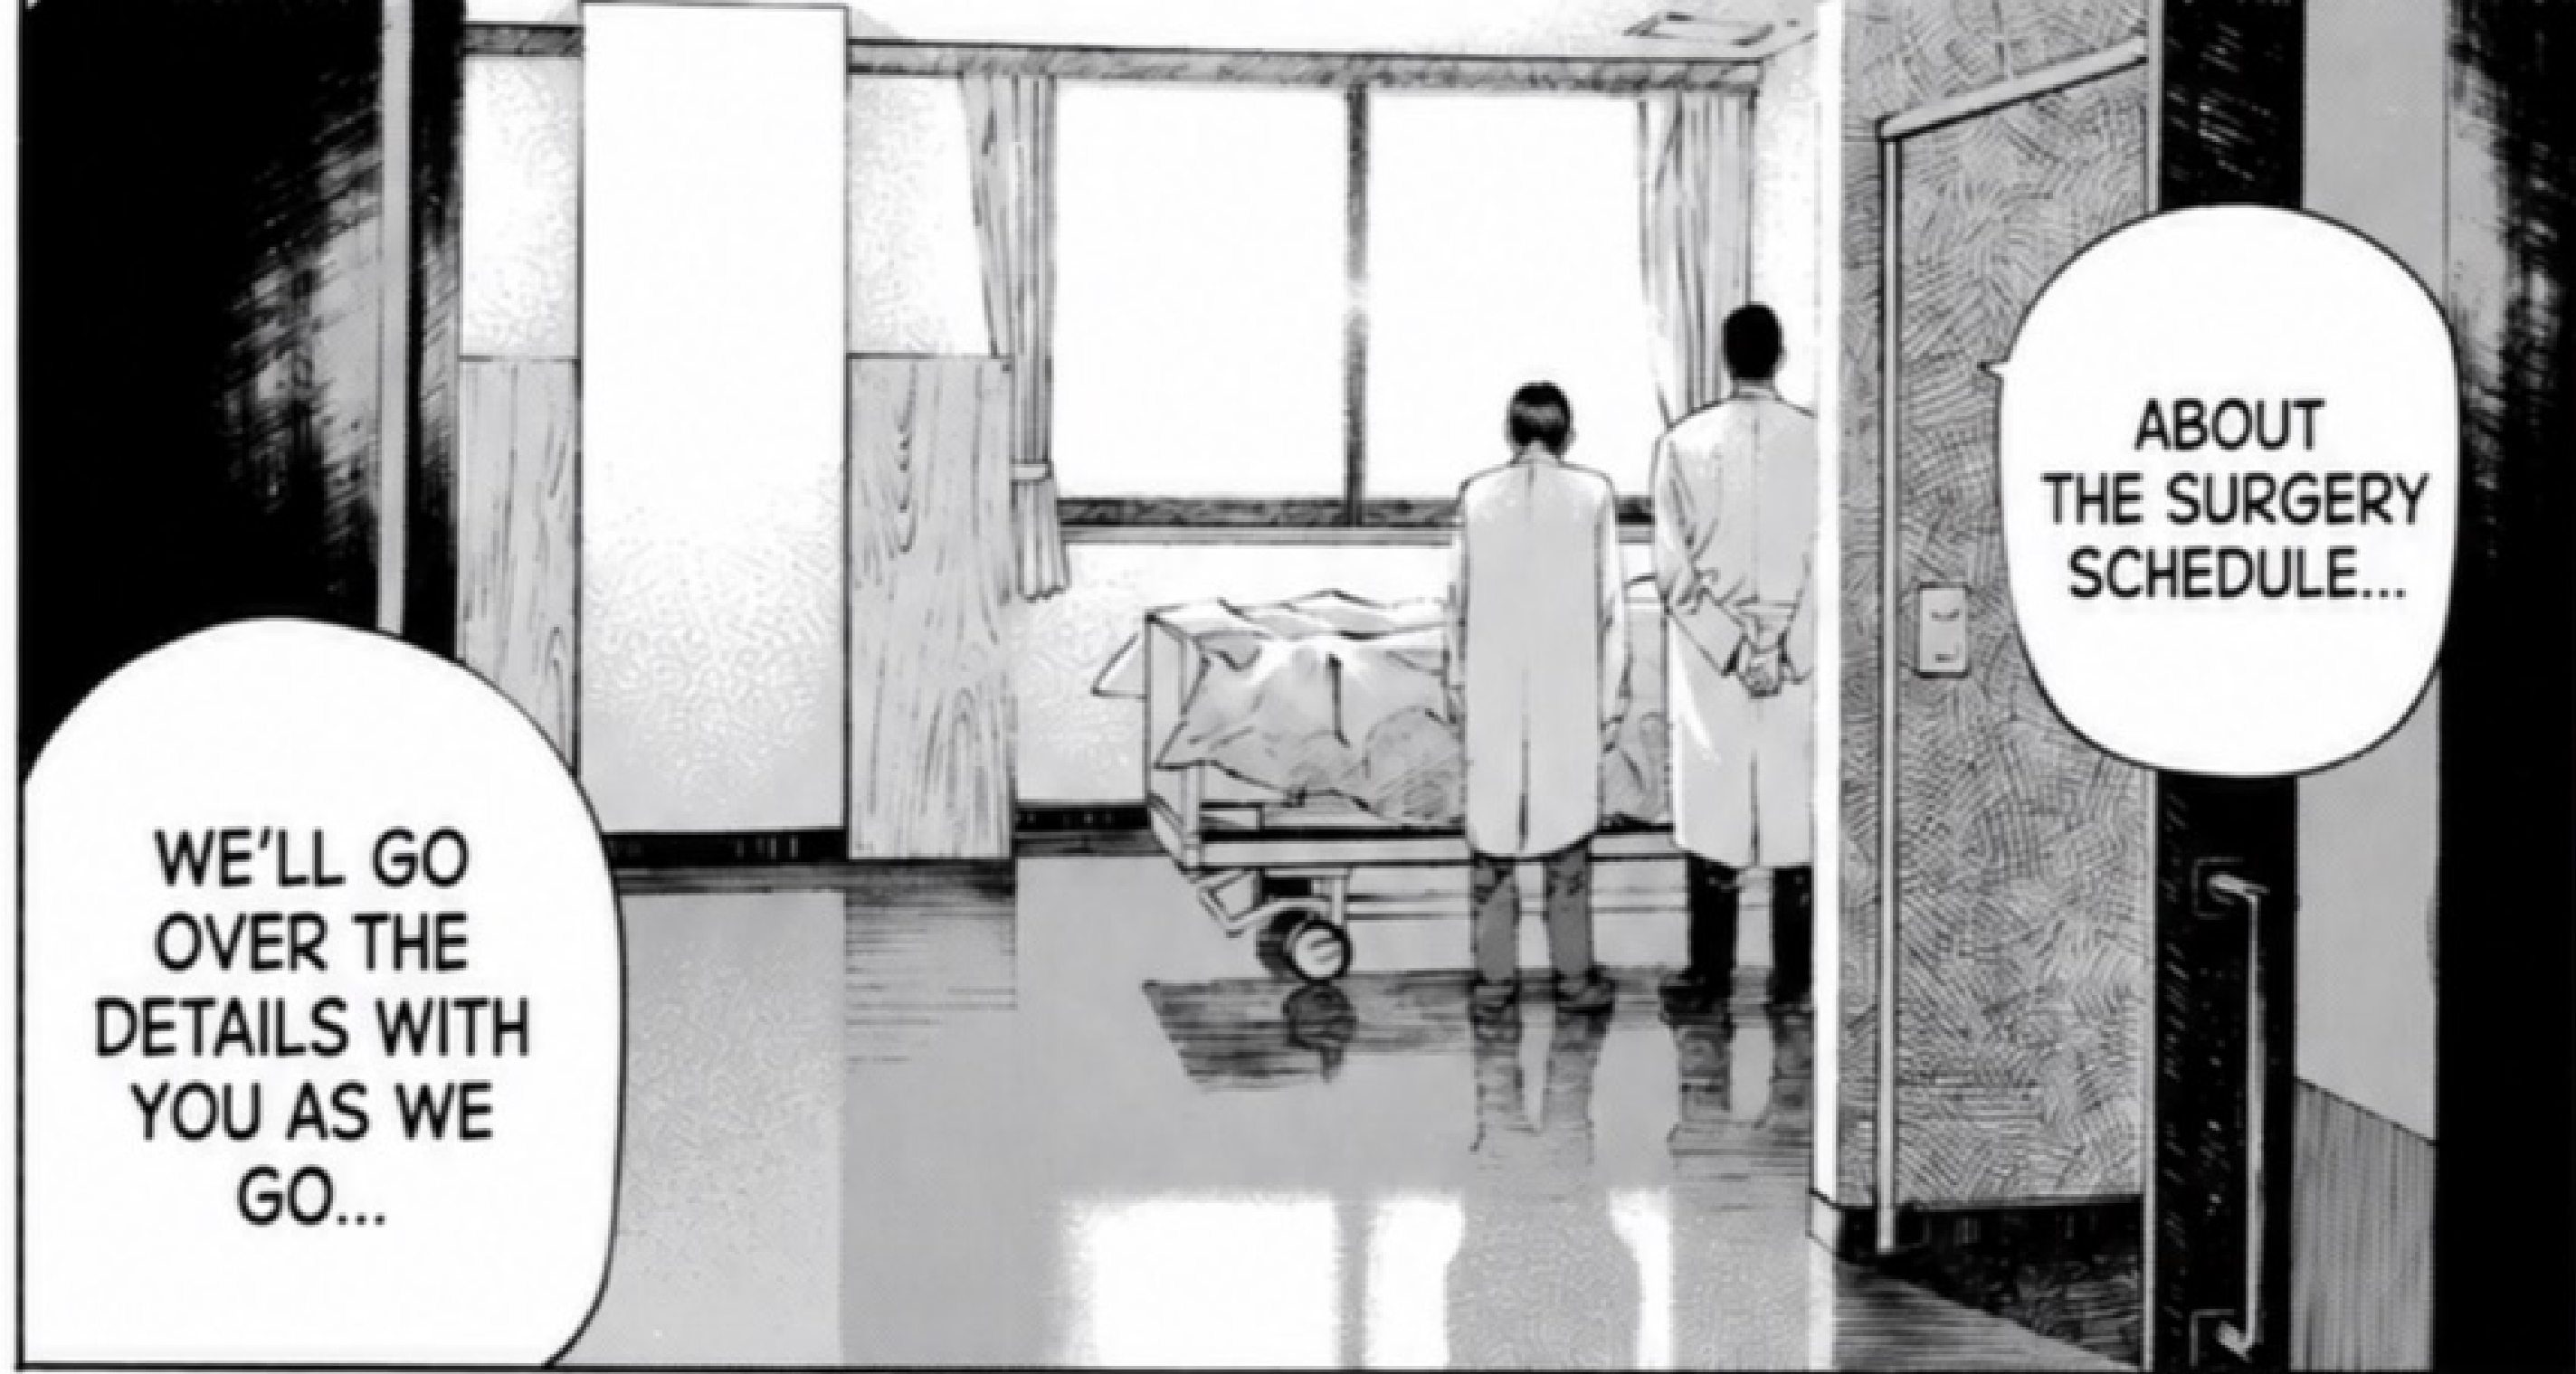

...a surgery where we connect another blood vessel to the blocked part of the heart's blood vessels.

Coronary artery bypass surgery is...

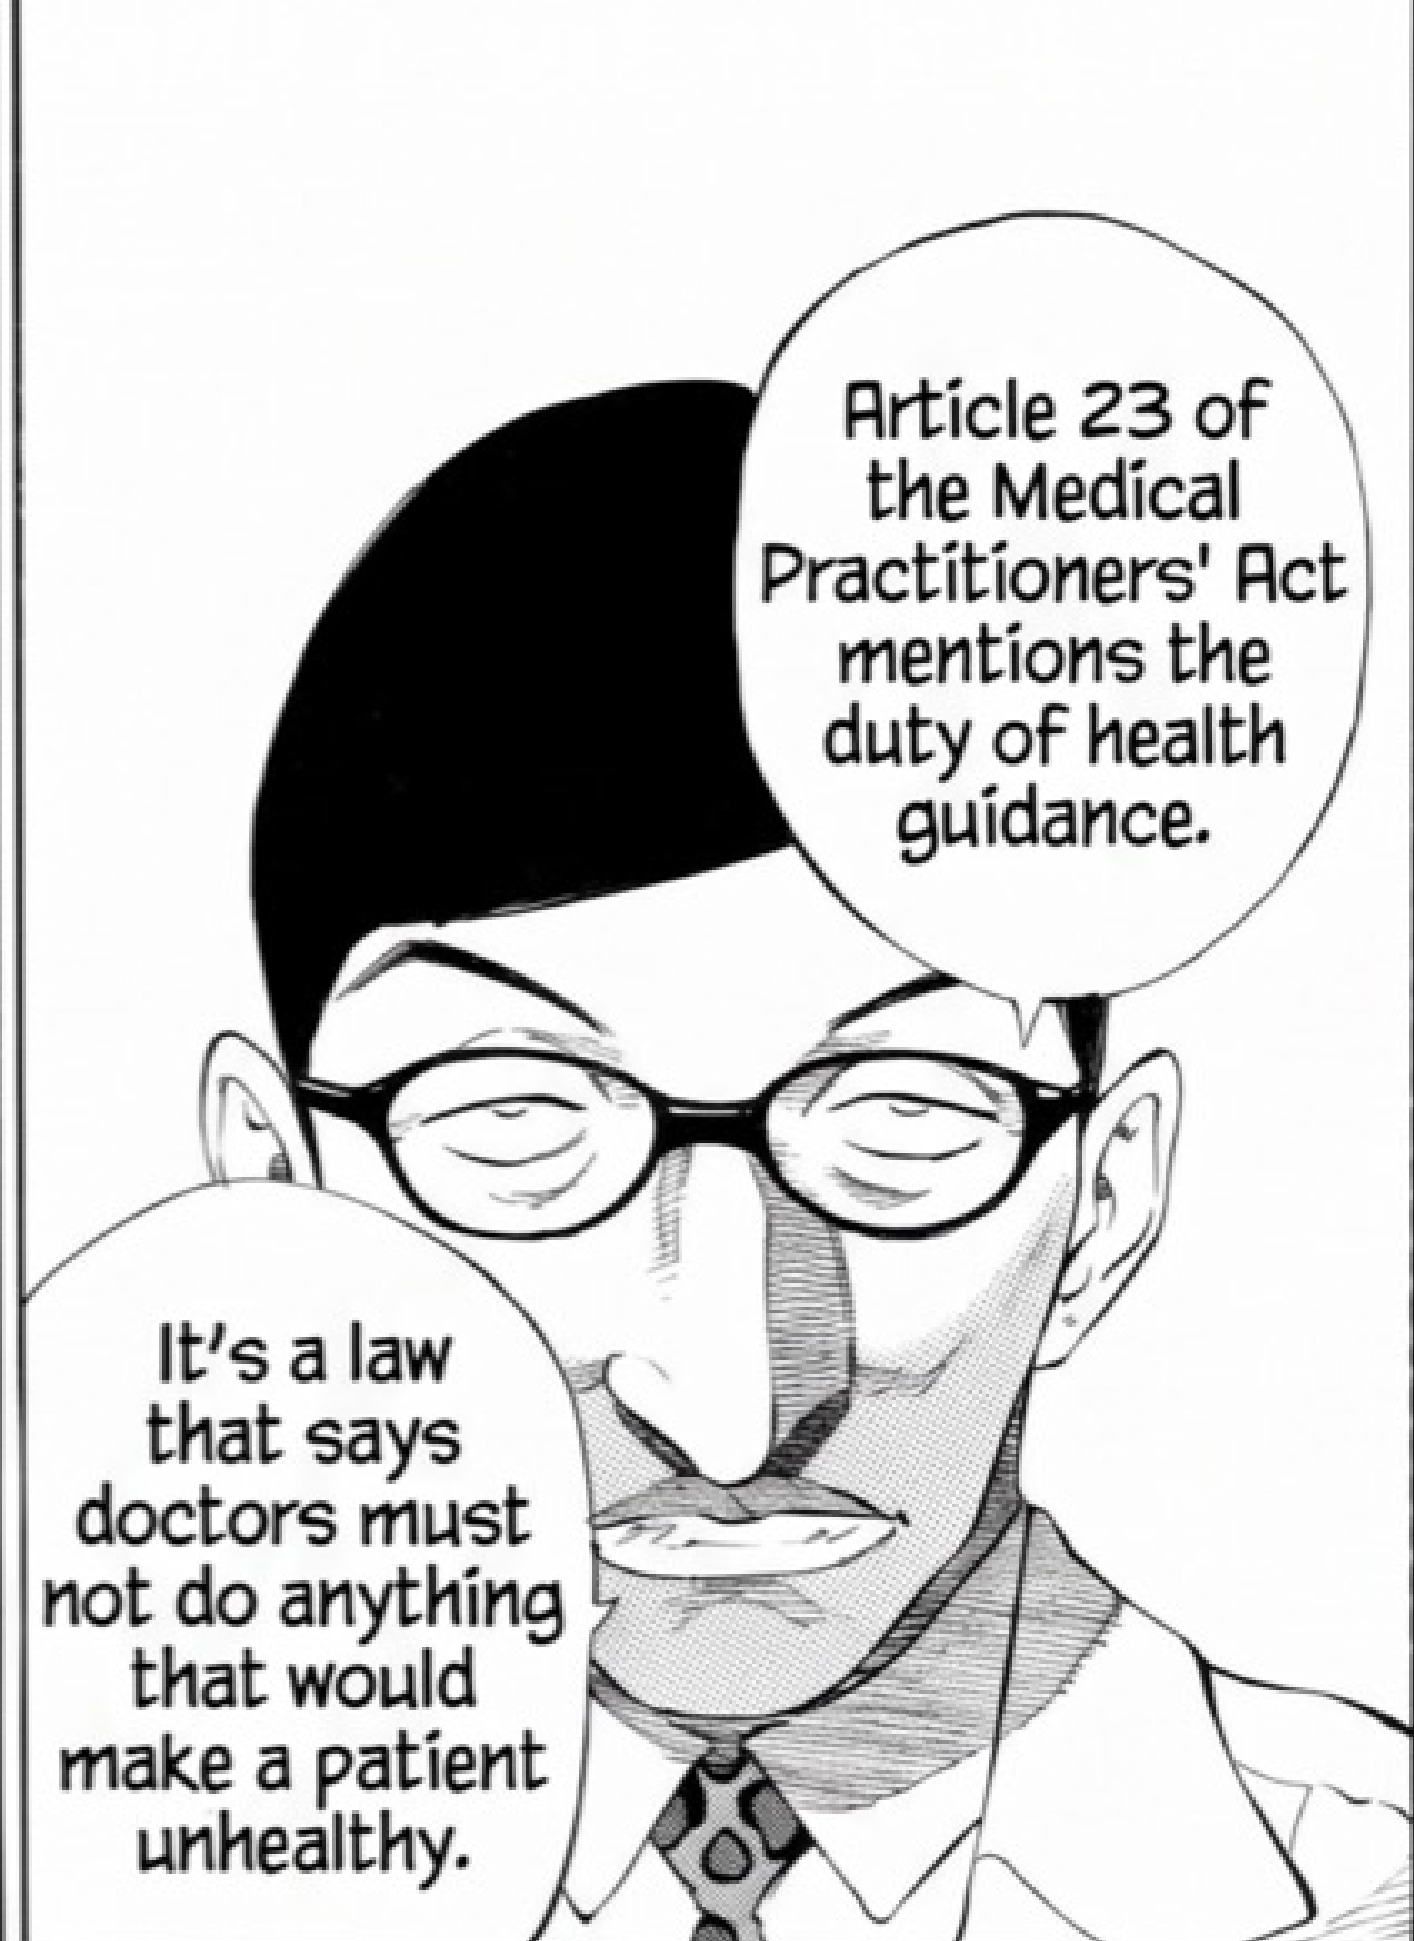

Think of it simply as bypassing a clogged pipe with another pipe.

For the bypass, we will use a blood vessel called the internal thoracic artery, which is located inside the chest.

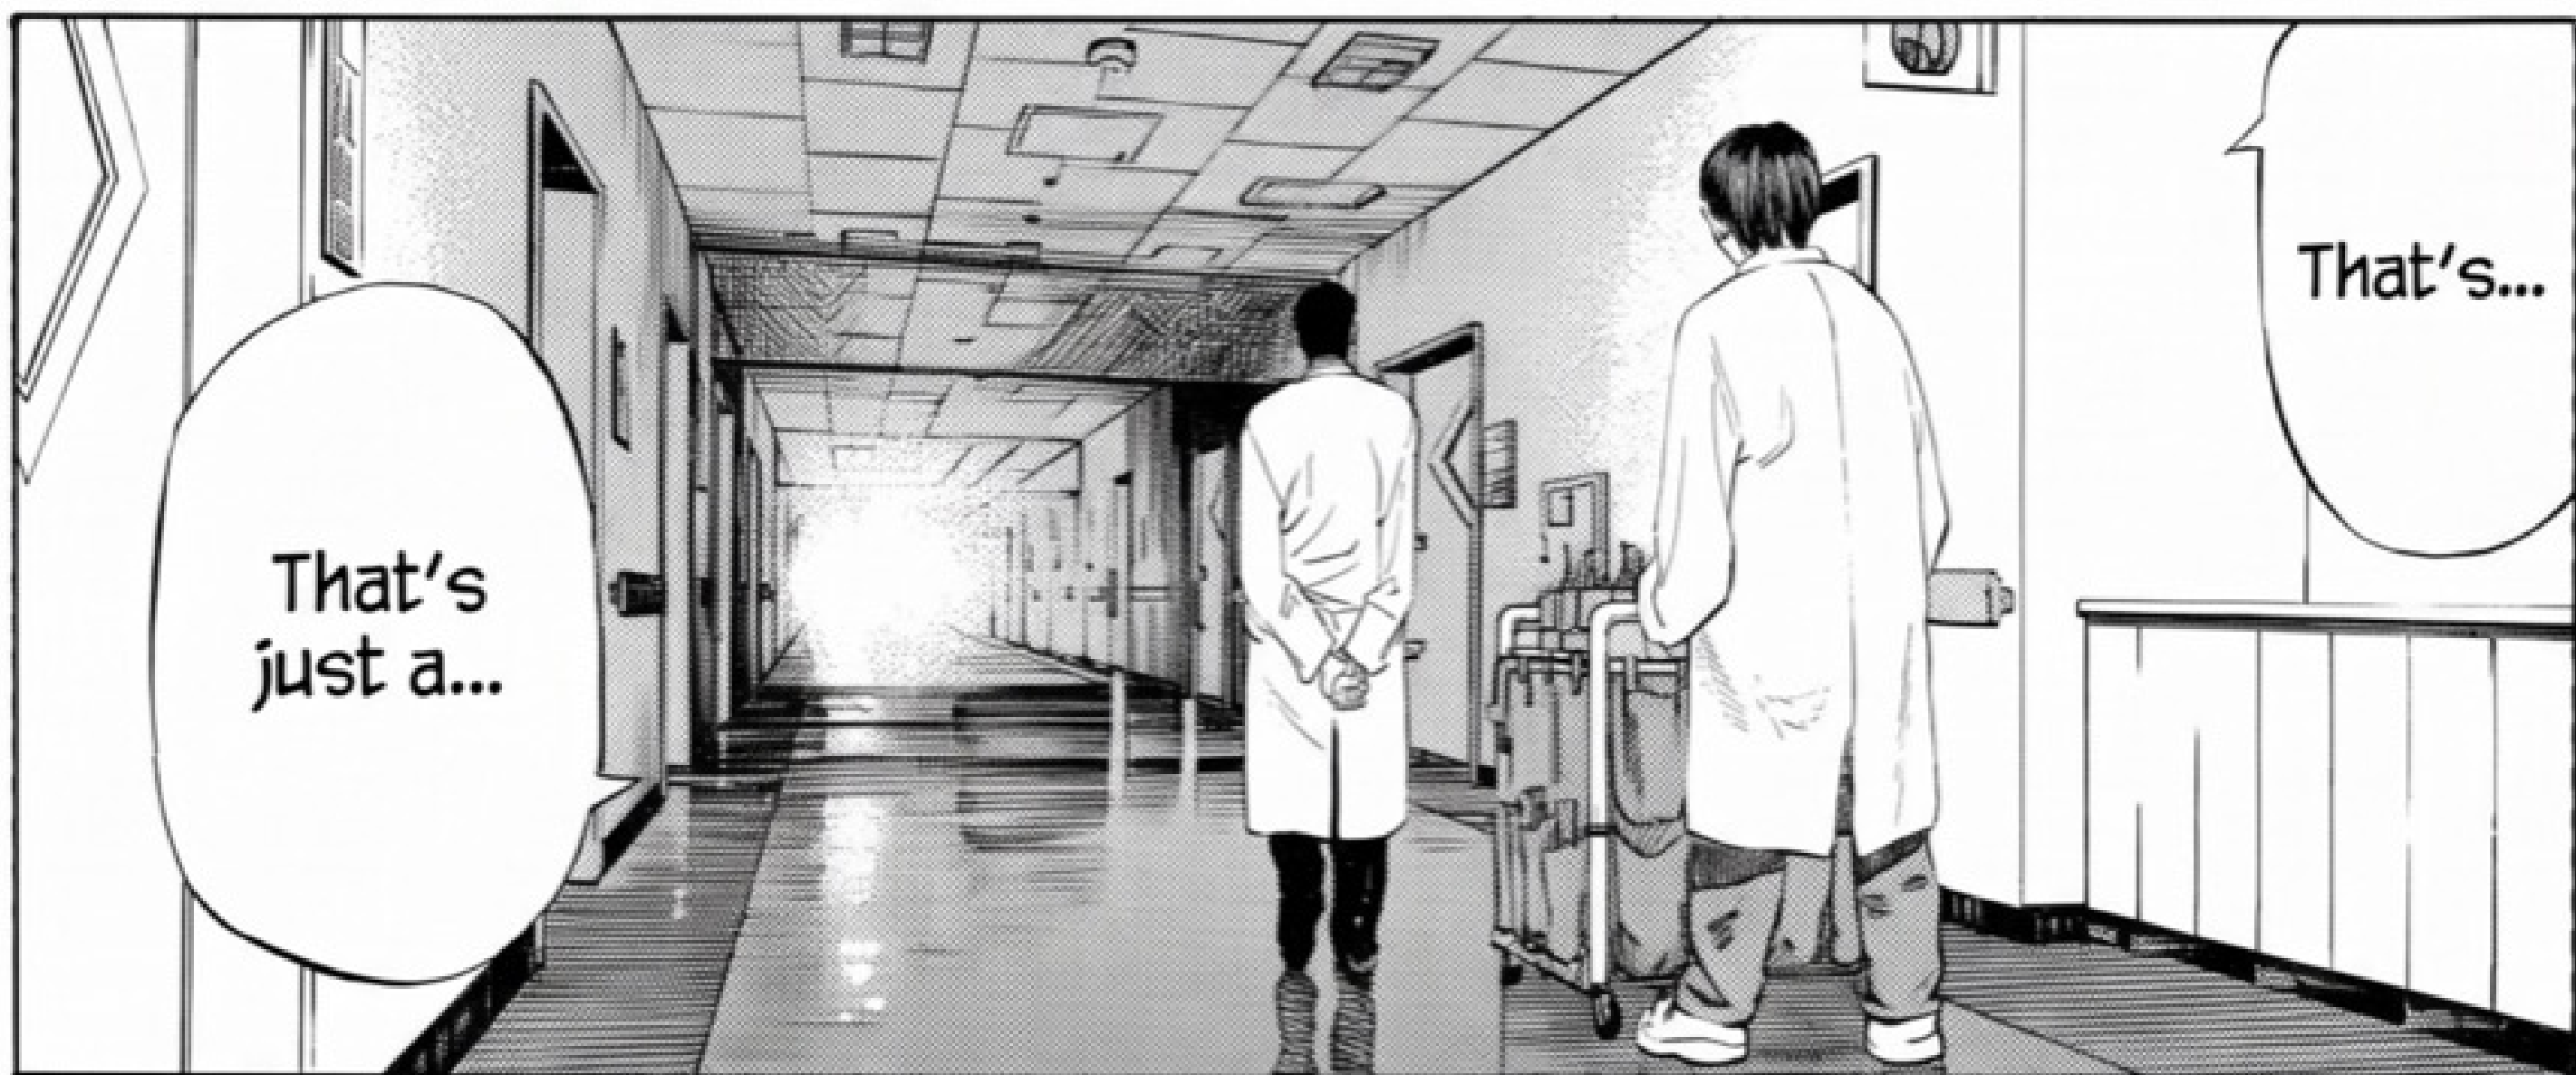

Giving him
"anxiety" is
not good for
his heart...

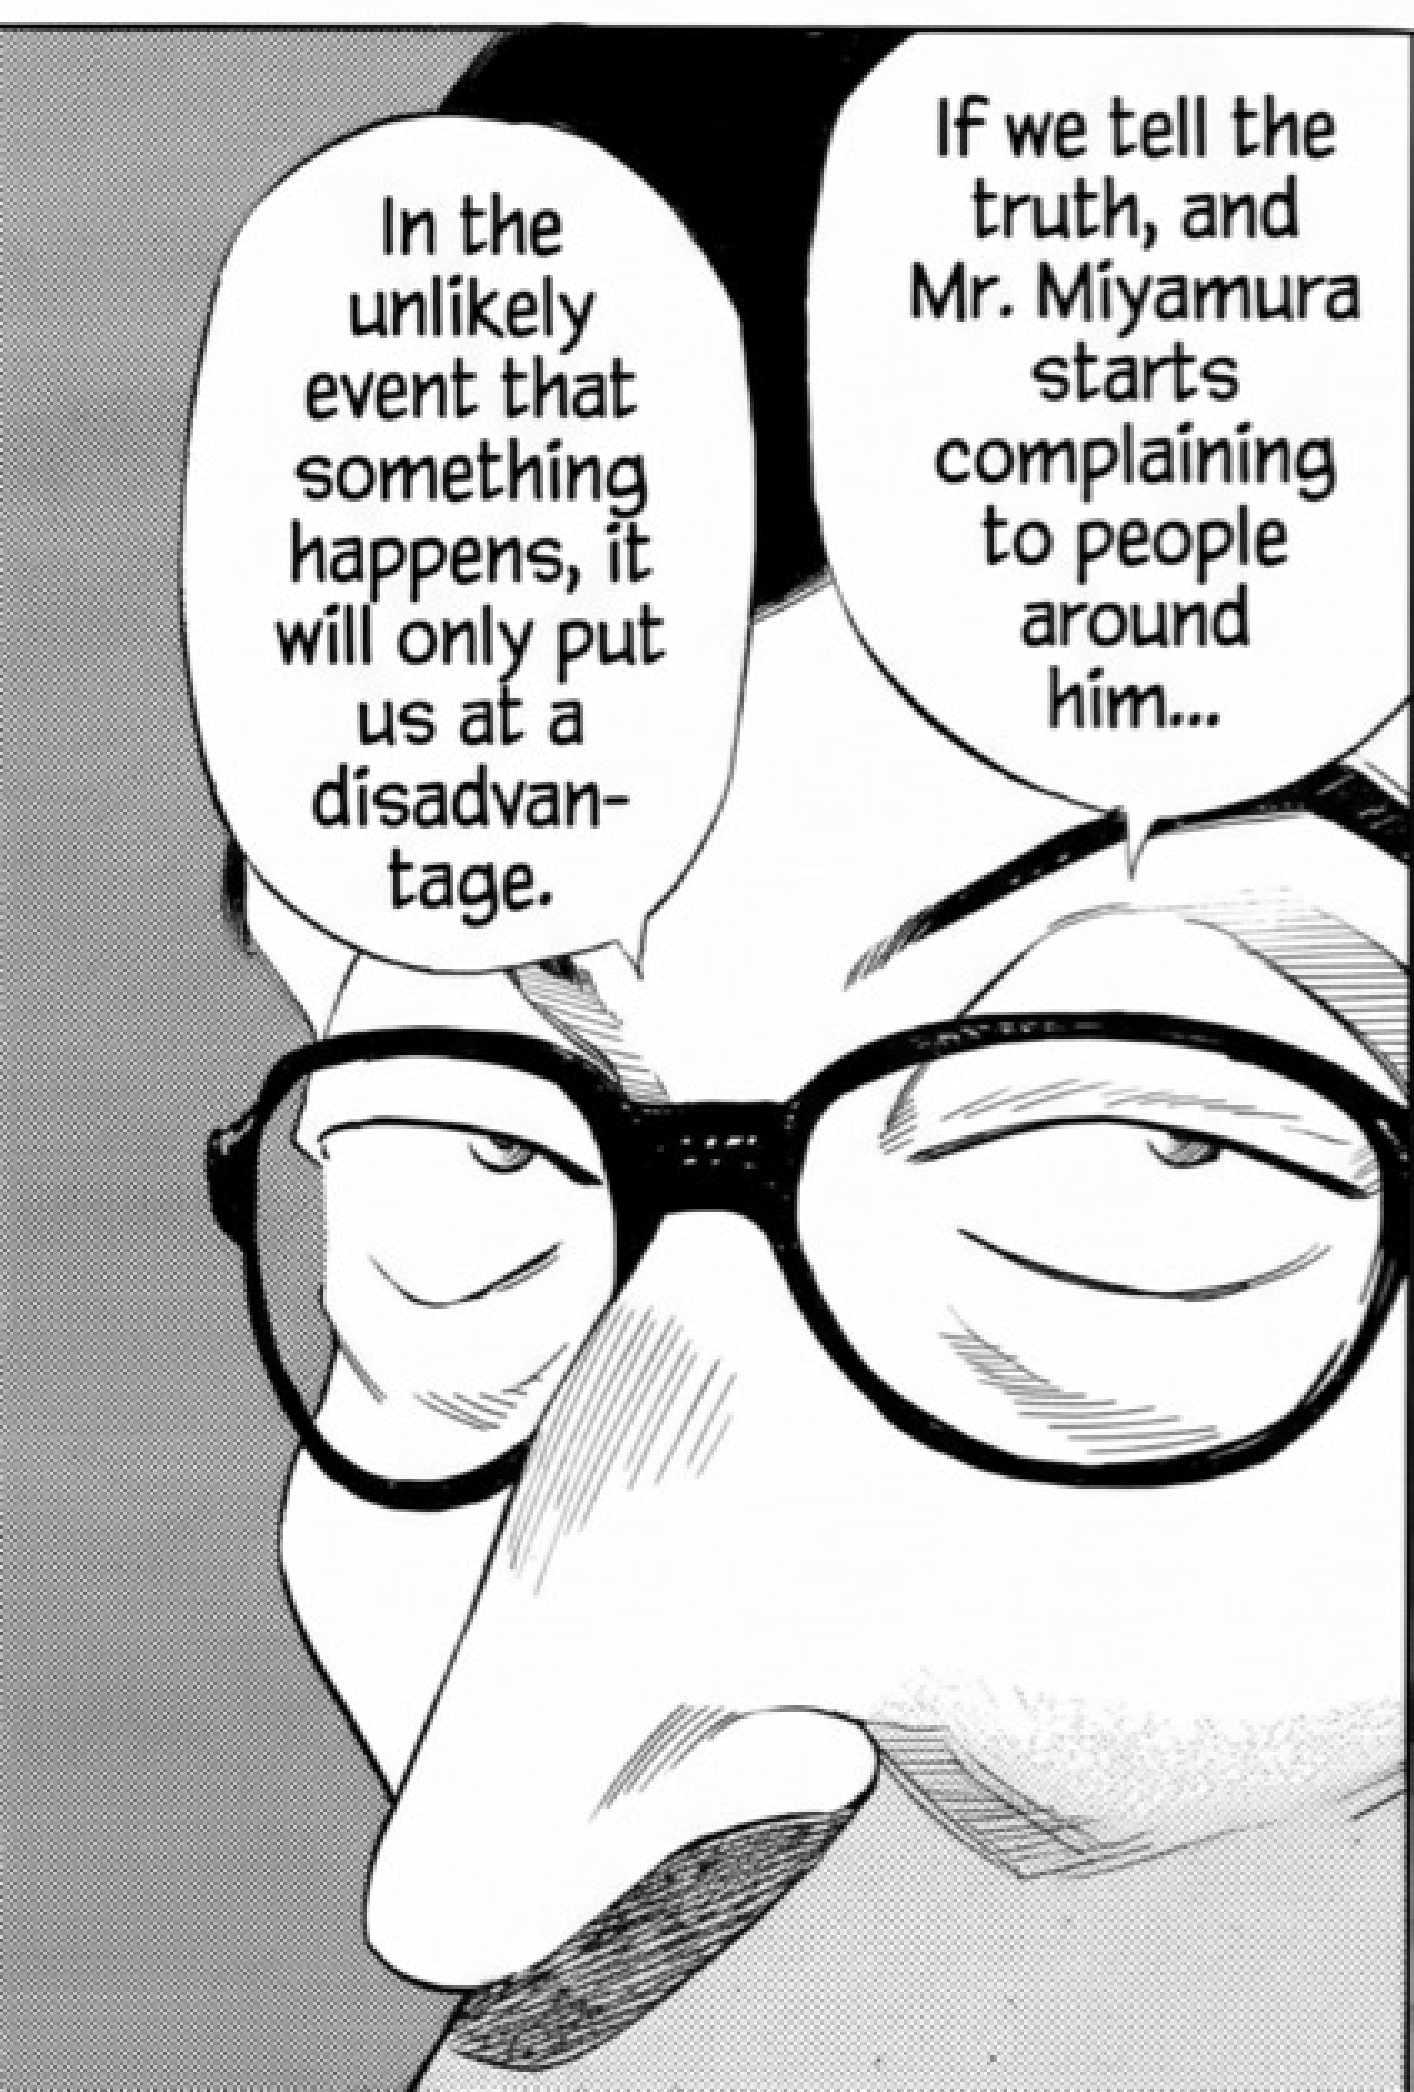

Article 23 of
the Medical
Practitioners' Act
mentions the
duty of health
guidance.

It's a law
that says
doctors must
not do anything
that would
make a patient
unhealthy.

That's
just a...

That's...

In the
unlikely
event that
something
happens, it
will only put
us at a disadvan-
tage.

If we tell the
truth, and
Mr. Miyamura
starts
complaining
to people
around
him...

It's
just a
pretext.

In the
end, an
operation
is necessary.

First,
what will
change by
telling the
truth?

My thoughts...

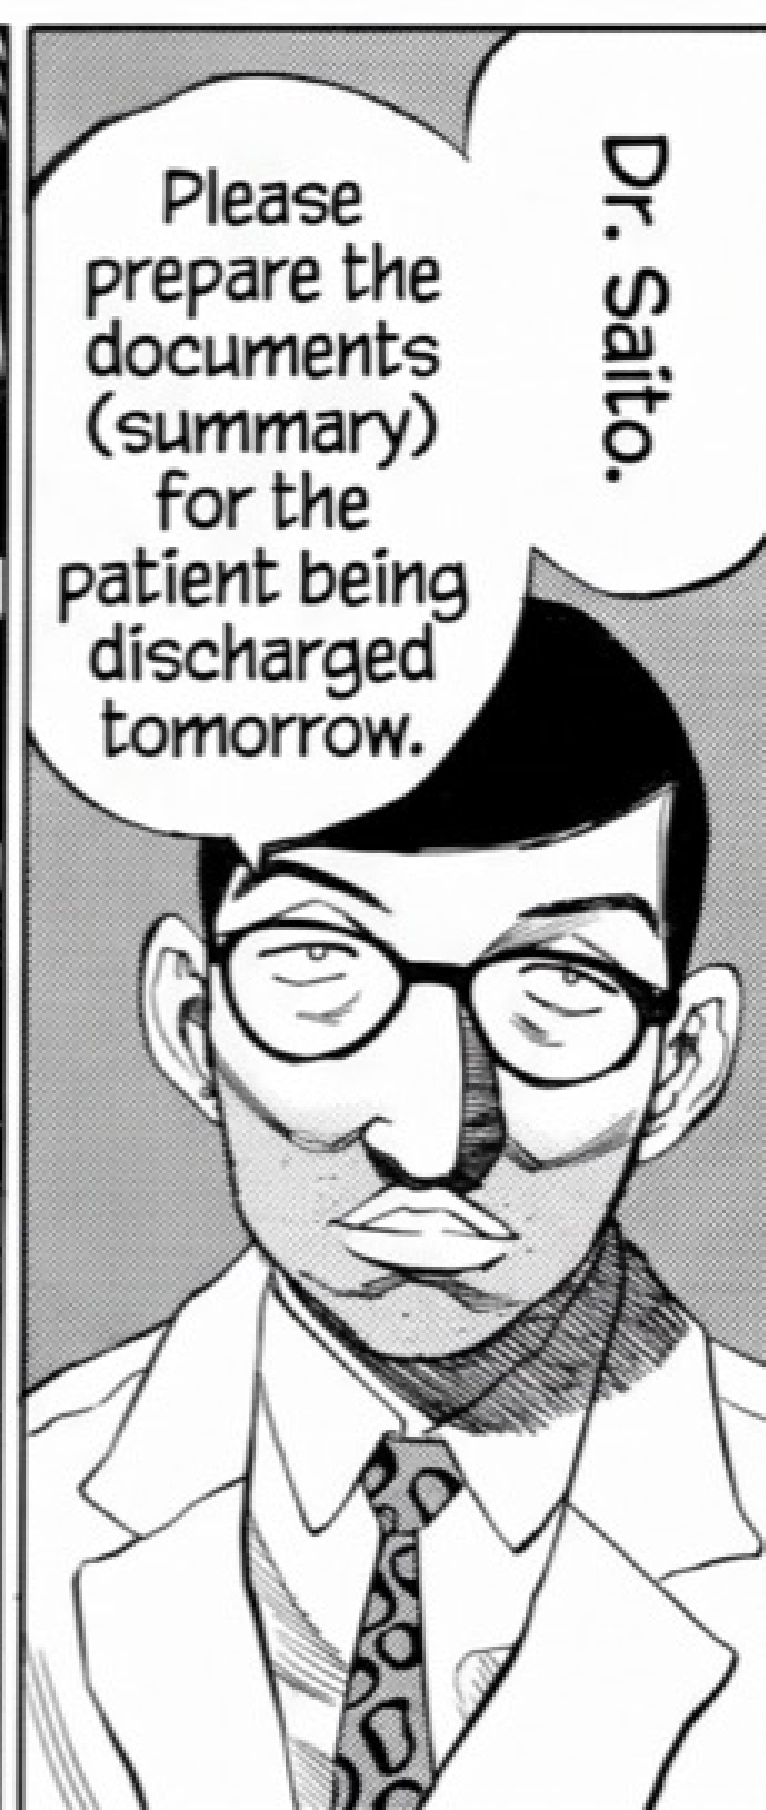

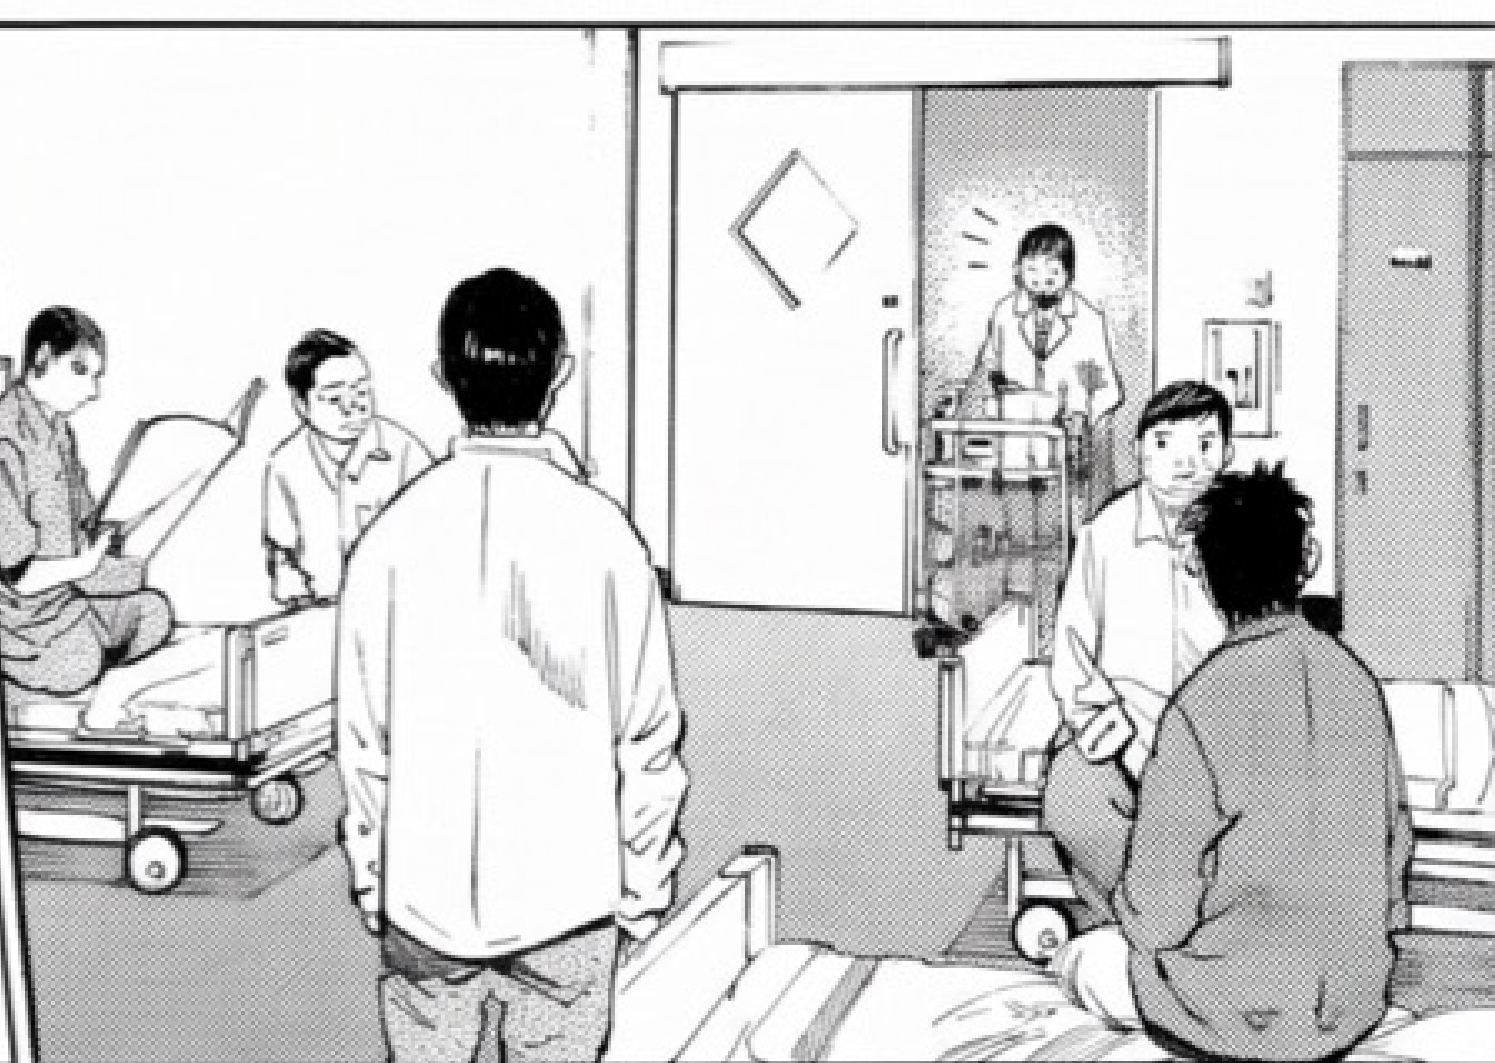

You mean I
should stop...?

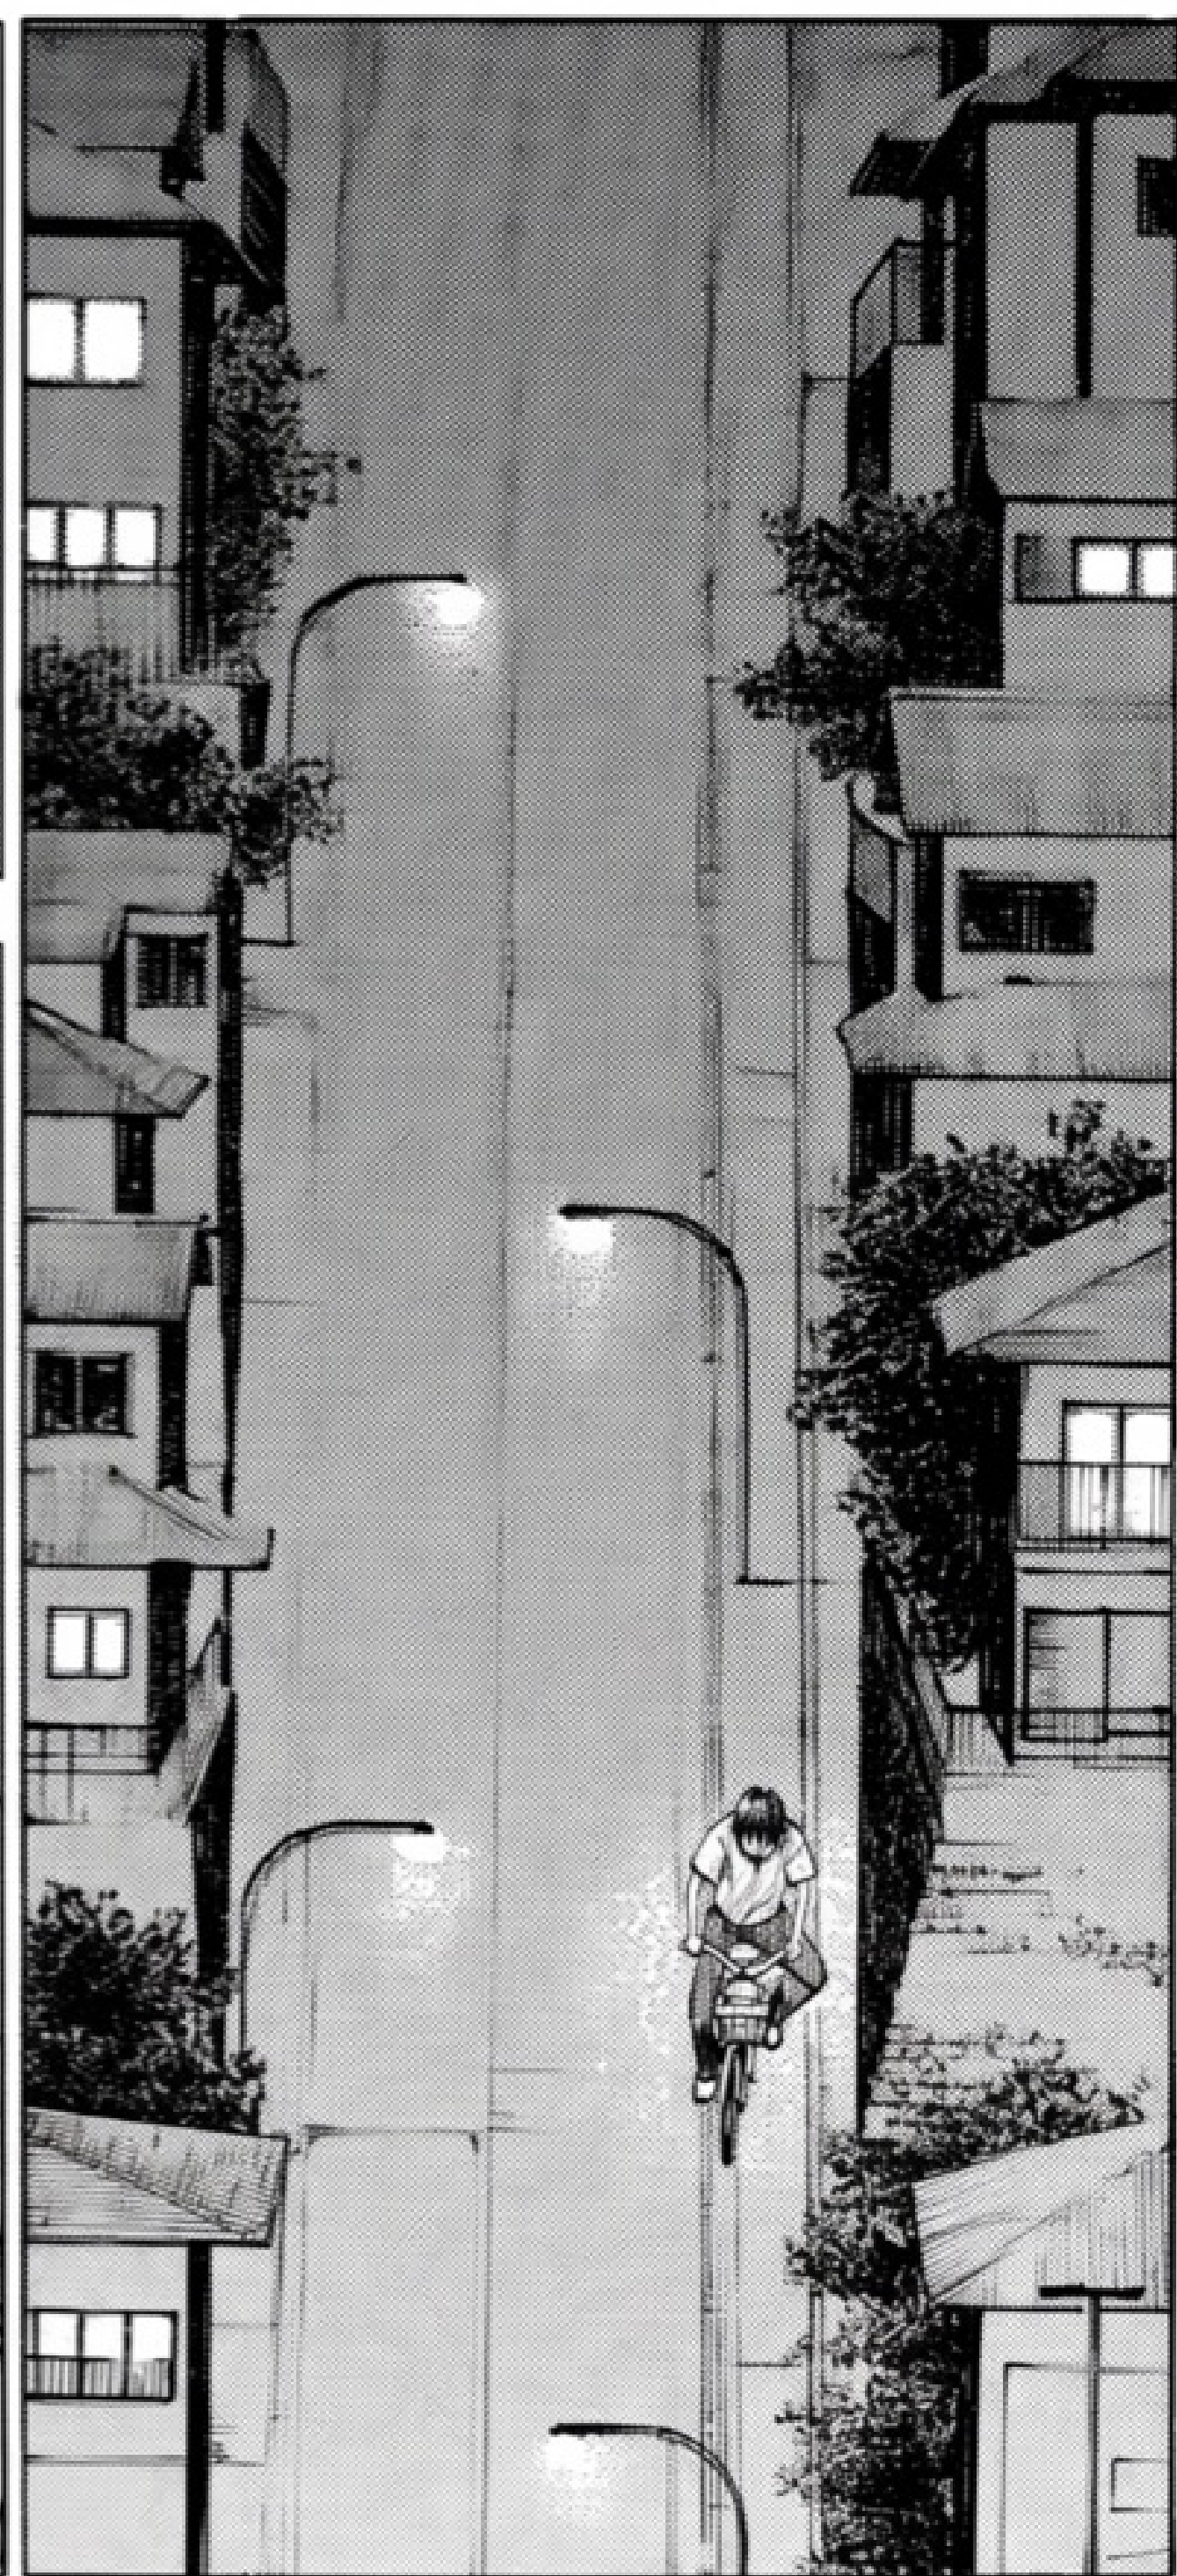

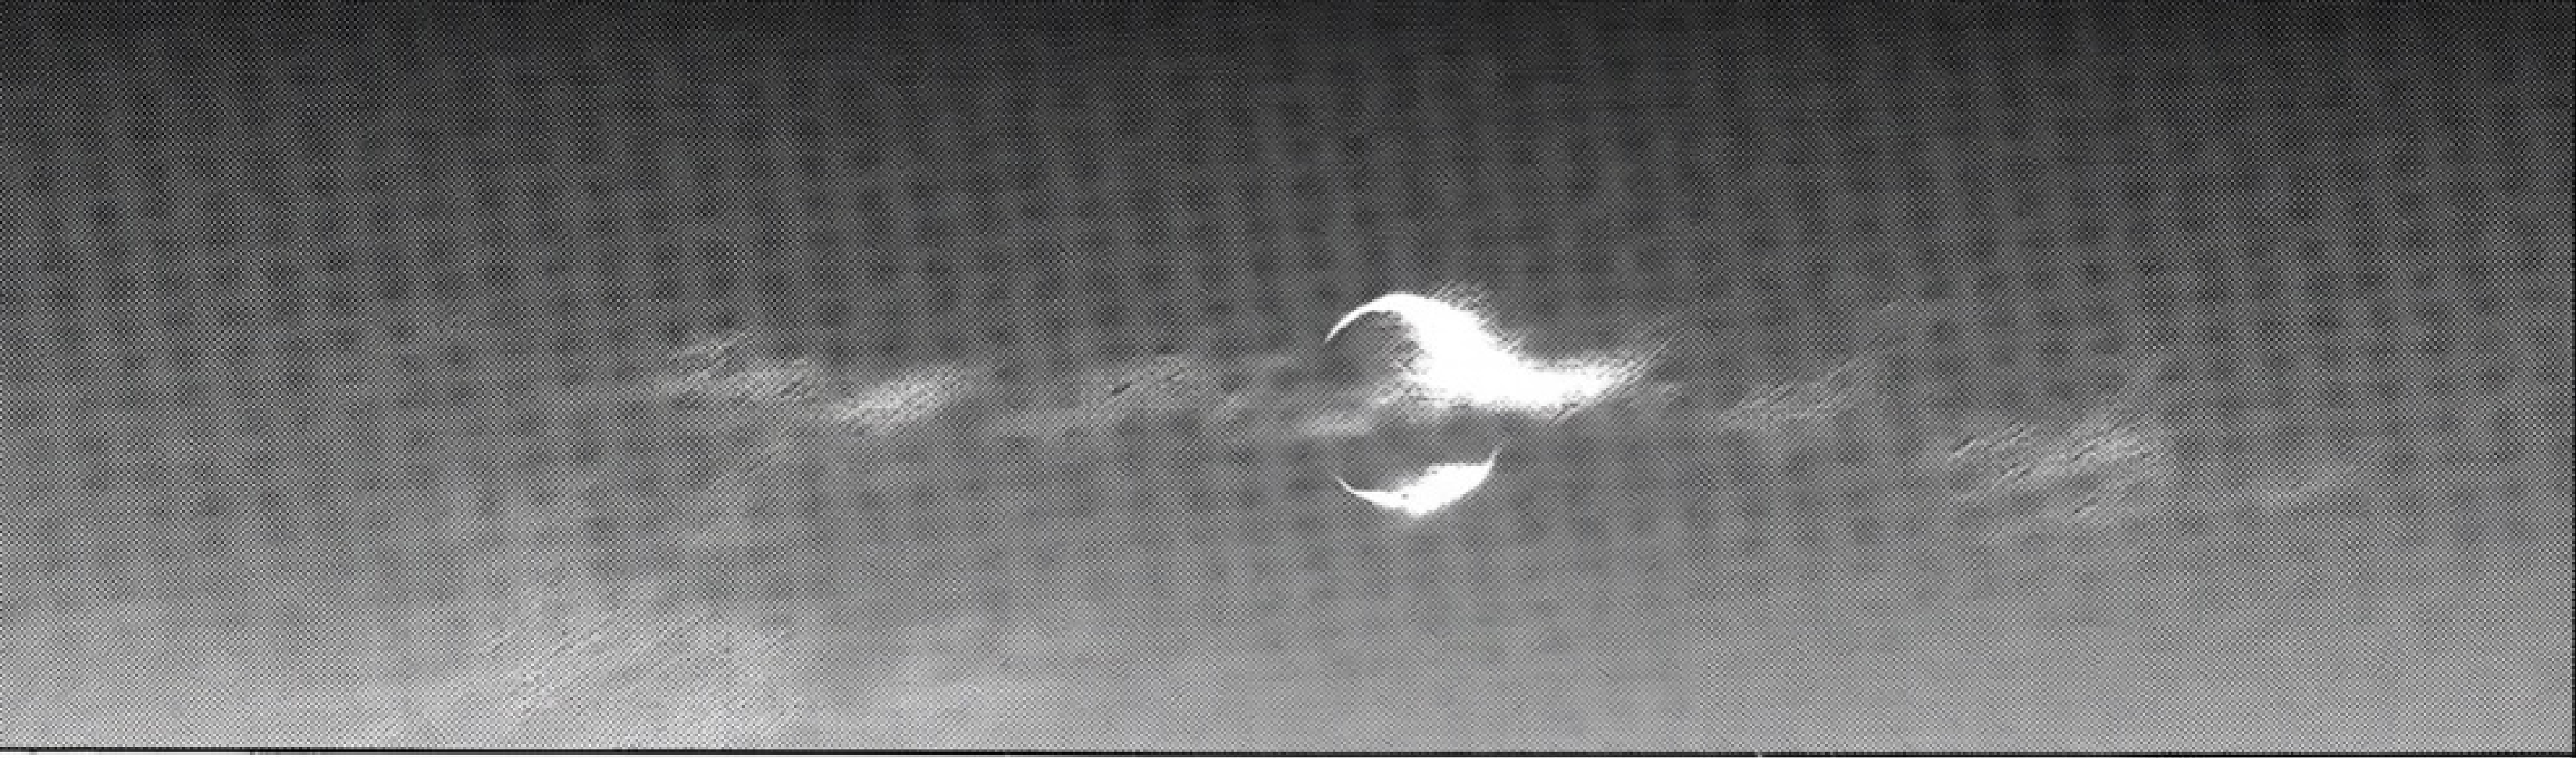

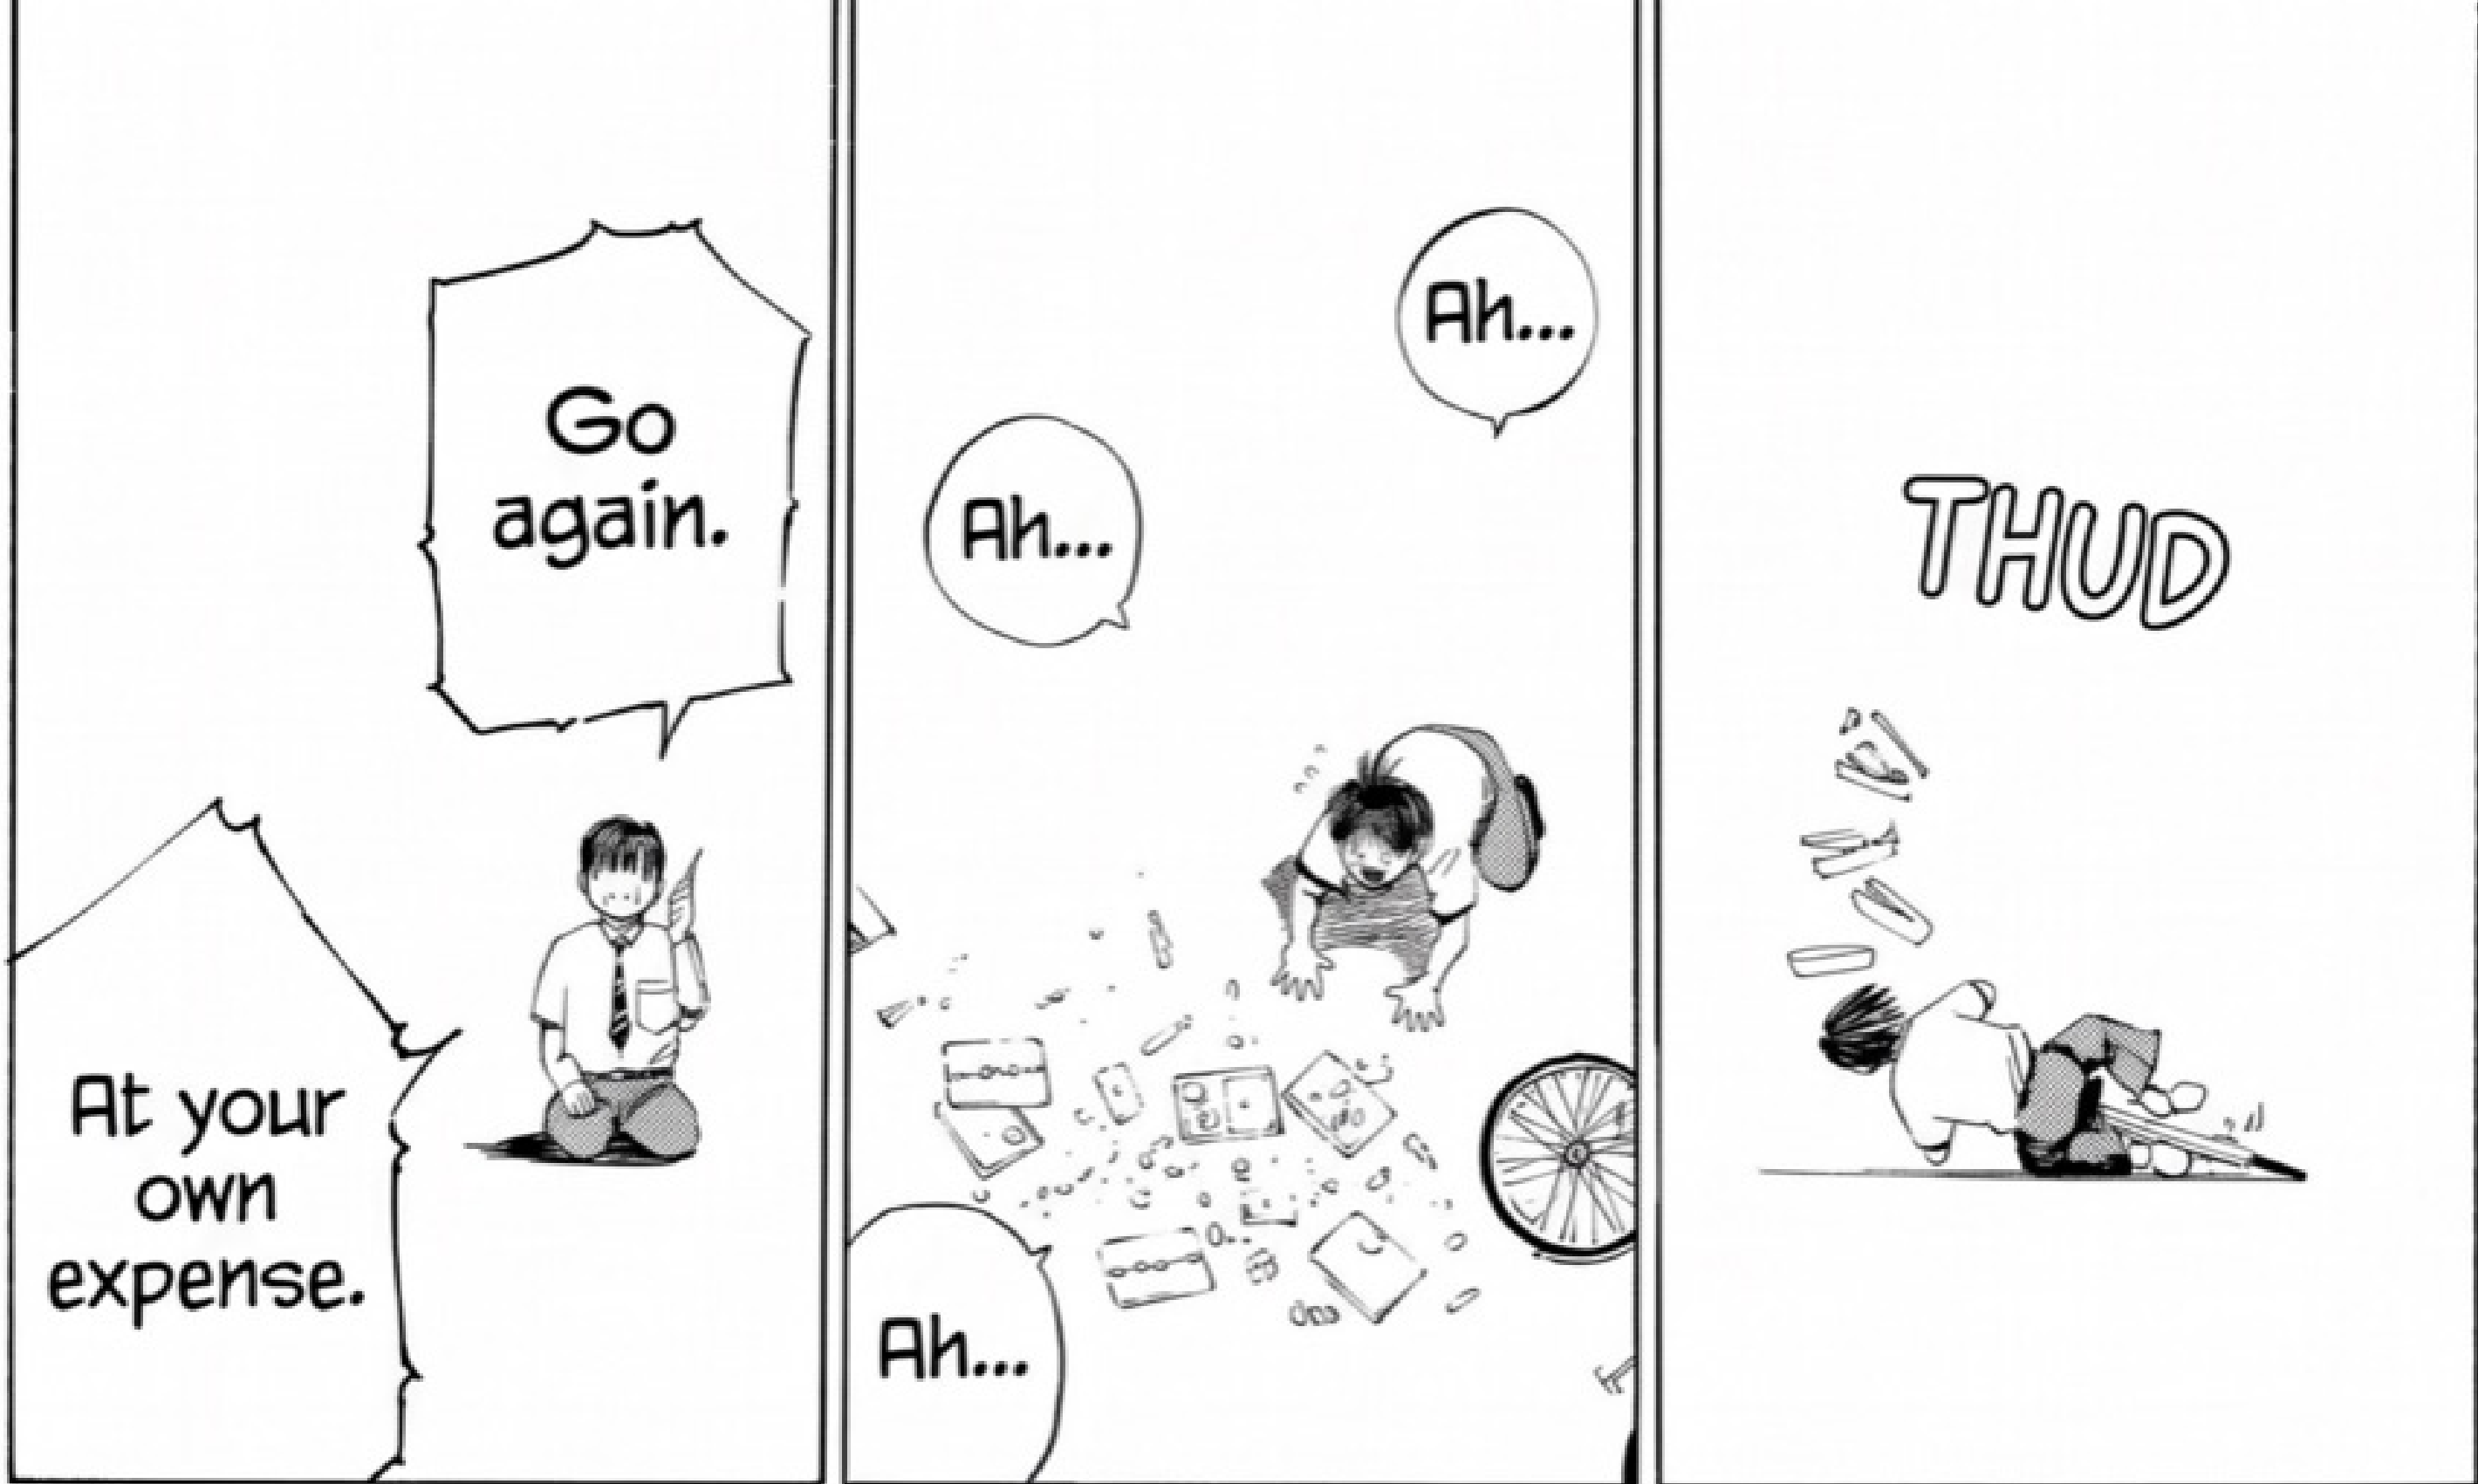

Work is
piling up.

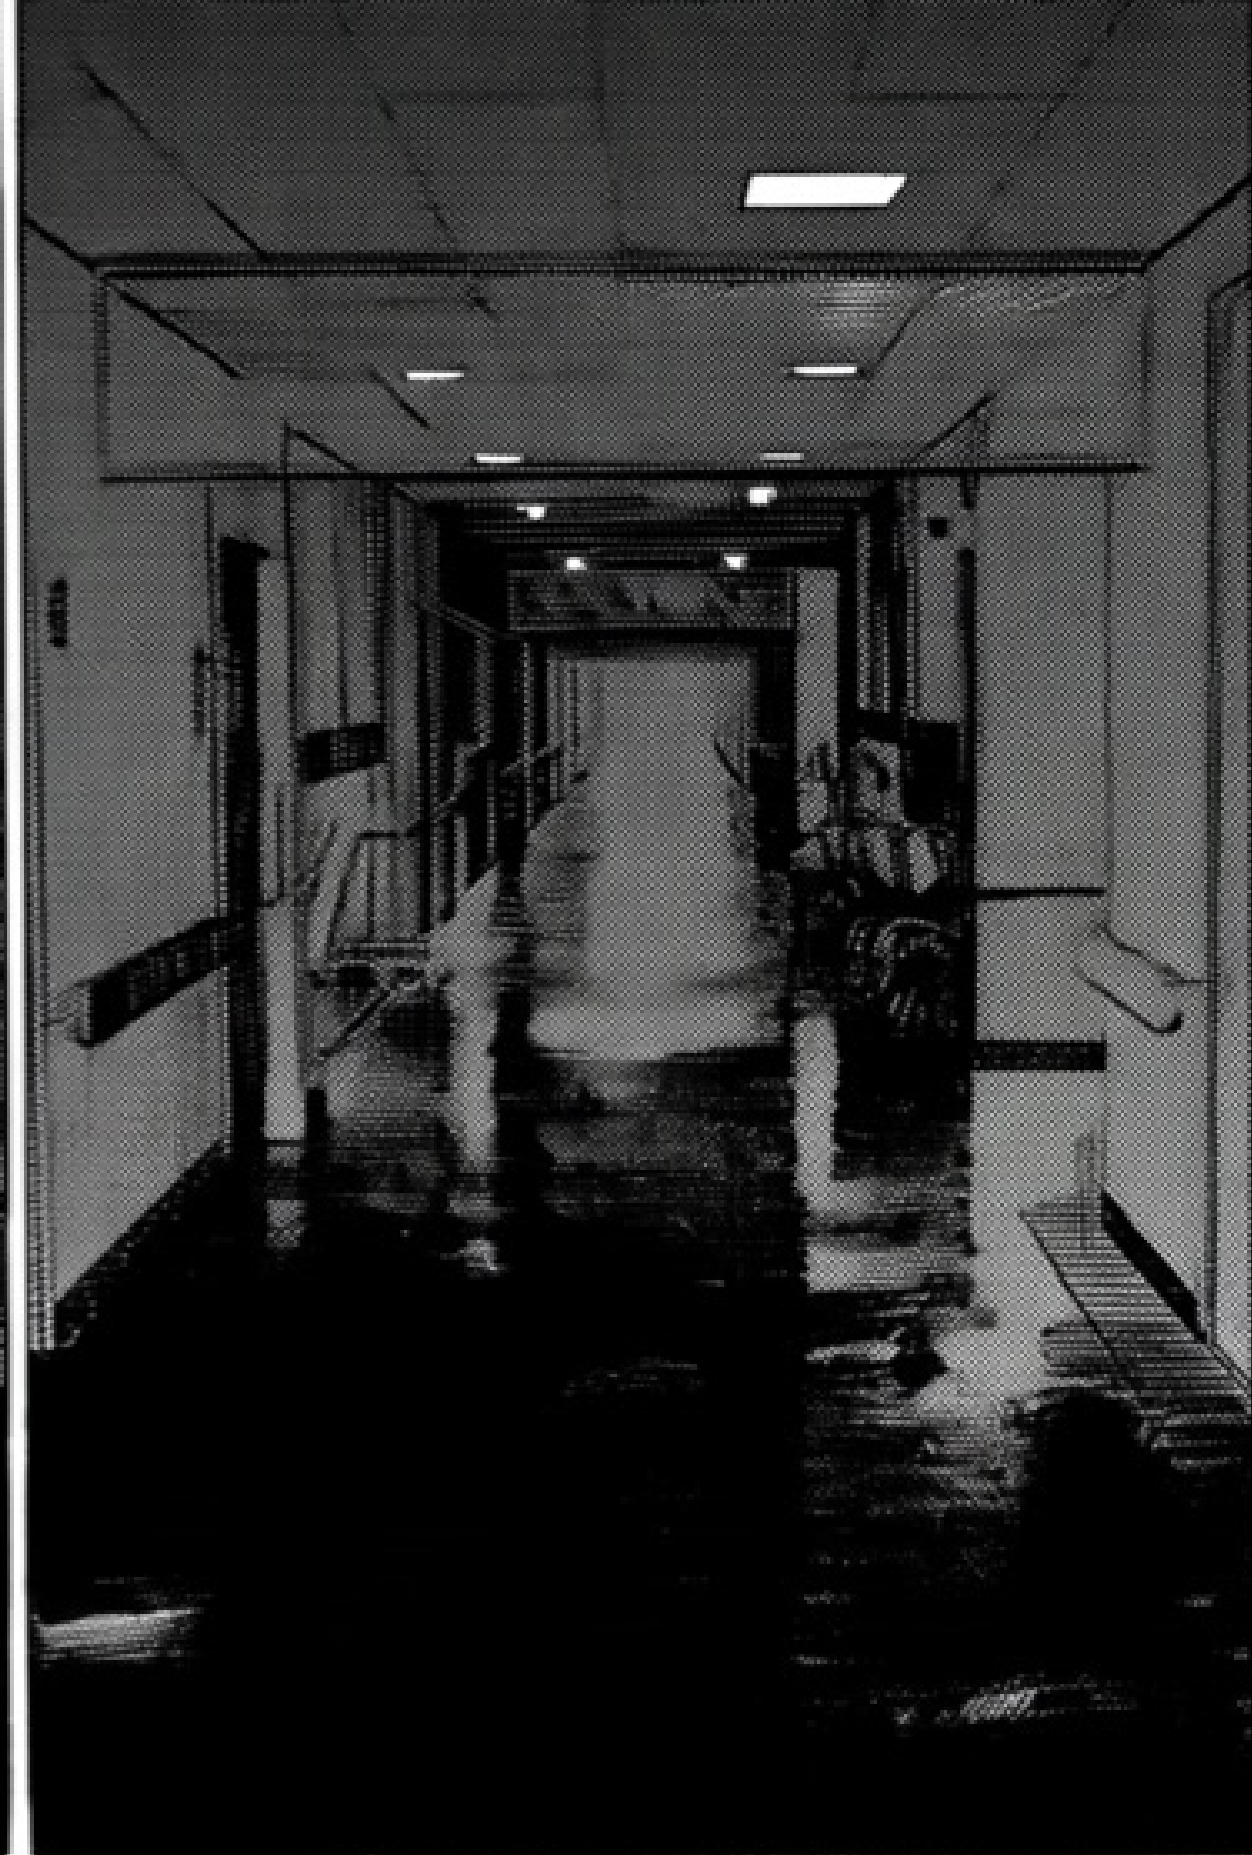

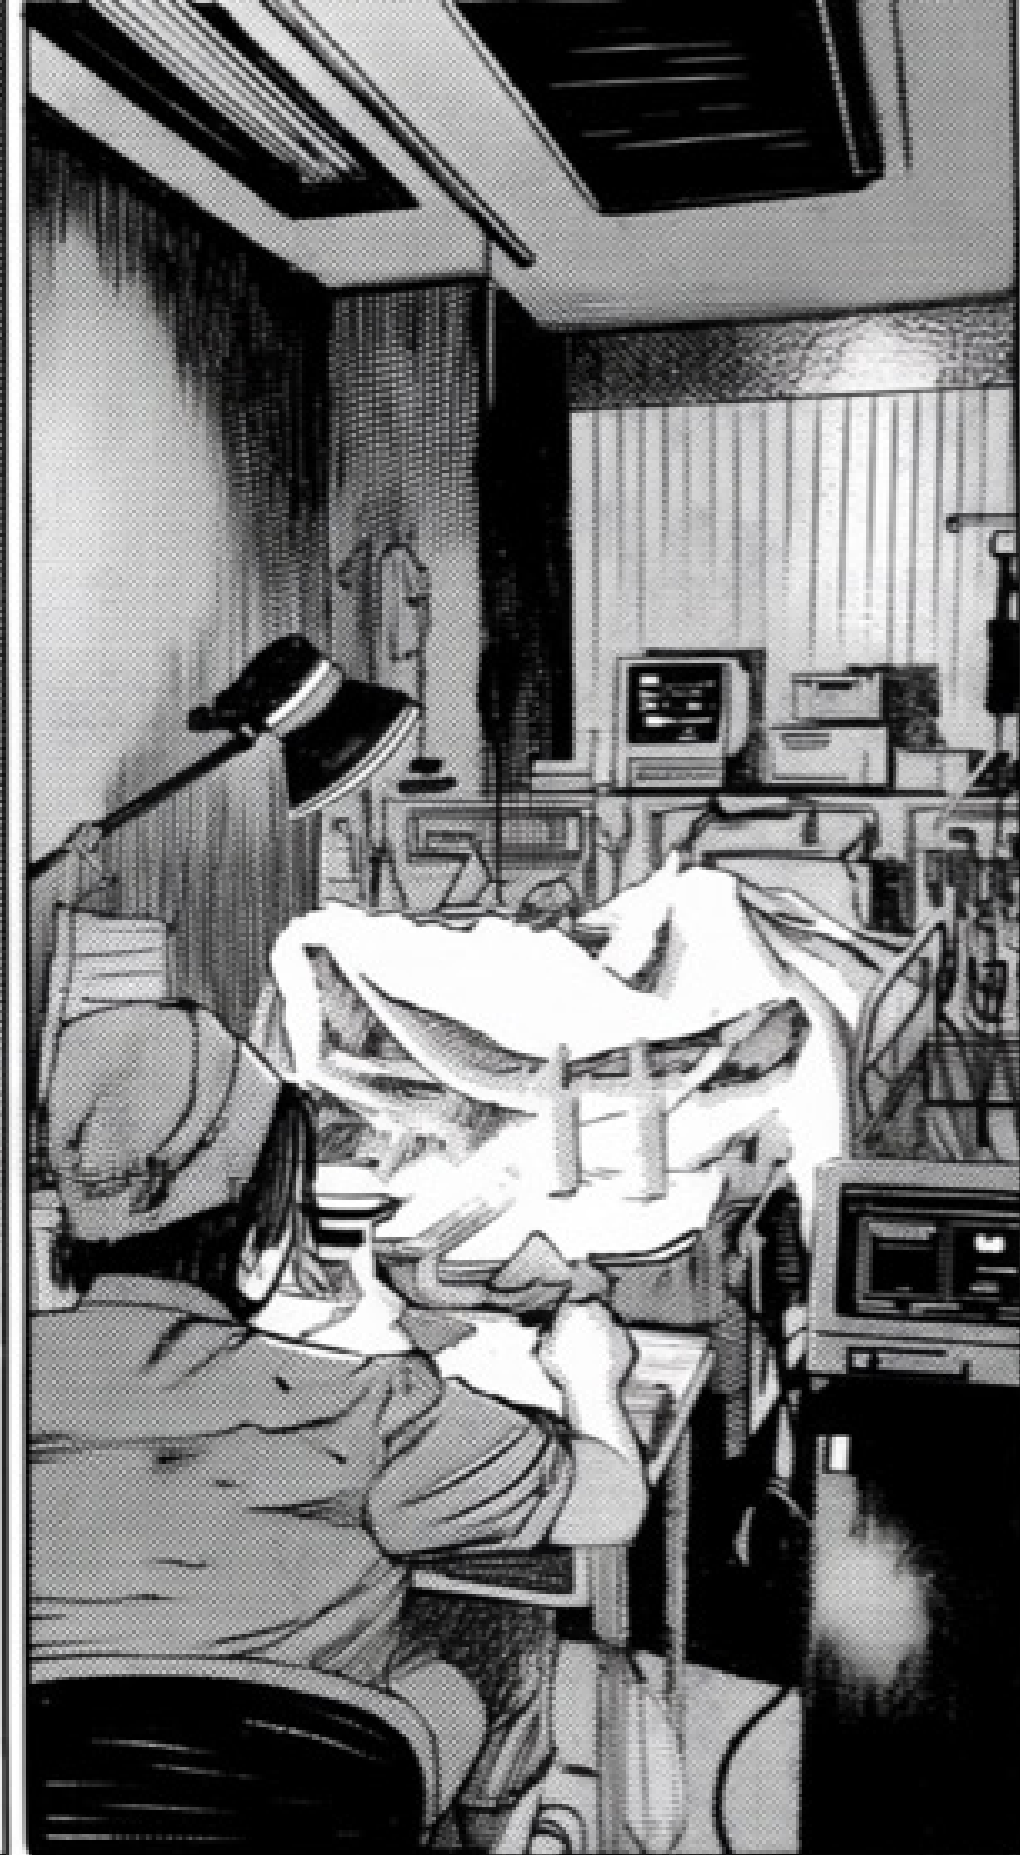

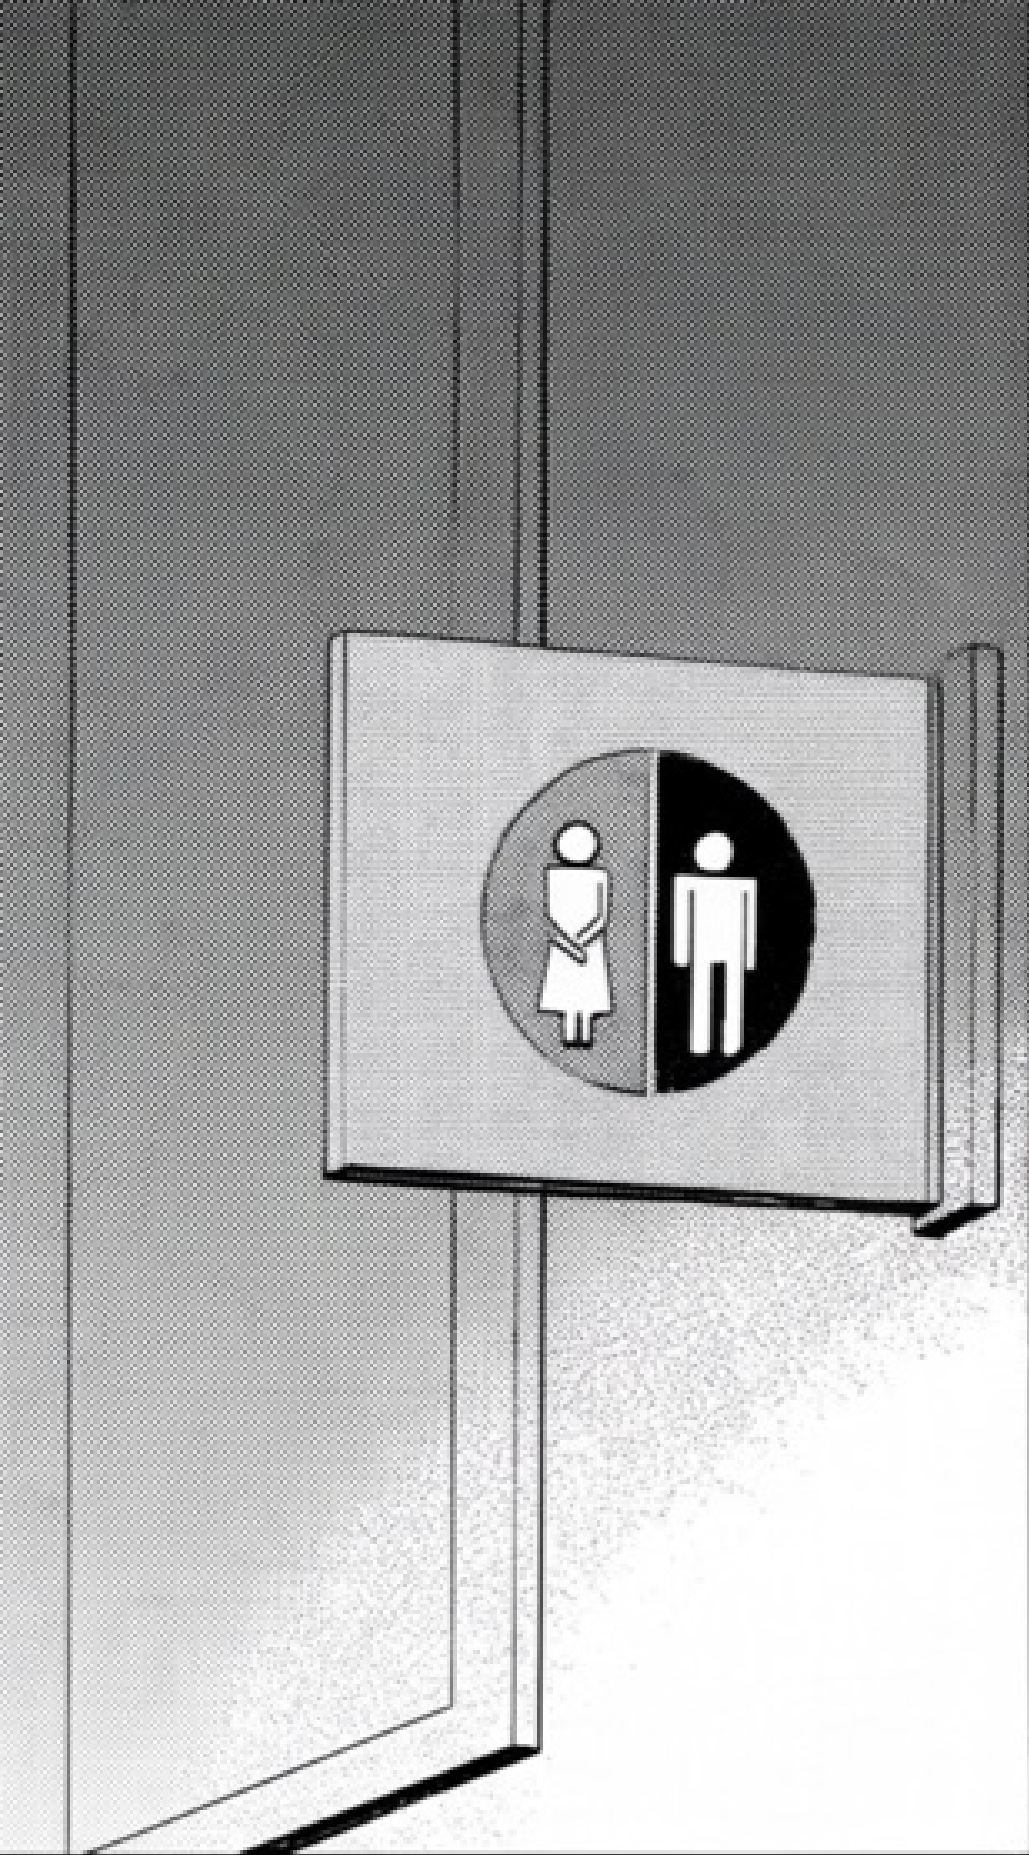

Don't delay the
work by thinking
unnecessarily...

U...
Uu...
